What is this product?

Type

UCITS investment fund in the form of an authorised unit trust.

Term

The Sub-Fund has no maturity date, however the Manager is entitled to terminate the Sub-Fund at any time.

Objectives

Investment objective The Sub-Fund seeks to maximize total return consisting of current income and capital appreciation by primarily investing in USD-denominated high yield debt securities.

To achieve the Sub-Fund's investment objective, the Sub-Fund will invest primarily in USD-denominated non-investment grade debt securities, including fixed or floating rate bonds, that are issued by governments, supranational entities, public or private companies domiciled in, or whose principal operations are in developed markets. In selecting securities, the Investment Manager combines a top-down (meaning a general assessment of the overall market environment) and bottom-up (meaning a more subjective approach, researching the individual issuers) investment philosophy, with a strong focus on a security's relative value.

Under normal circumstances, the Sub-Fund intends to invest primarily in non-investment grade bonds (i.e., assigned with a rating of below BBB- by Standard & Poor's or Fitch Ratings or below Baa3 by Moody's) or bonds which are unrated.

The Sub-Fund may also invest in mortgage backed bonds (i.e. a bond which is secured by a mortgage or by a group of mortgages), convertible bonds, exchangeable bonds and preferred stocks. The Sub-Fund uses forward foreign exchange contracts to manage and offset currency risk.

The Sub-Fund seeks to promote environmental and social characteristics in line with Article 8 of the Sustainable Finance Disclosures Regulation (SFDR) by virtue of the incorporation of environmental, social and governance ("ESG")- and sustainability risk-related factors into the Sub-Fund's investment and credit analysis process for potential and current portfolio investments on an ongoing basis. This includes identifying securities' issuer's potentially material ESG risk issues based on ESG factors, including (i) climate impact (in particular the issuer's initiatives to achieve carbon reduction objectives), (ii) issues related to the treatment of human capital (including but not limited to ESG controversies, human rights and diversity and inclusion), and (iii) governance practices (including effective management and board oversight, strong ethical standards and continuous business and strategy improvements), and evaluating how they are being managed towards a sustainable outcome.

Share Class Benchmark The benchmark is Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index.

Benchmark The Sub-Fund is actively managed, in reference to a benchmark. Many of the securities in the Sub-Fund may also be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but the Investment Manager has some discretion to deviate from the benchmark composition and risk characteristics within certain risk parameters. Examples of this are being aware of and constraining differences in sector, country or constituent weightings between Sub-Fund and benchmark. These constraints will vary over time and are subject to change. The Investment Manager does not target a specific tracking error for the Sub-Fund but historically, tracking errors have ranged from 1-4%. This is subject to change at all times.

Though the Sub-Fund may share some composition and risk characteristics with the Sub-Fund's benchmark, the Investment Manager's discretion may result in performance that differs from that of the Sub-Fund's benchmark.

Redemption and Dealing This Unit Class of the Sub-Fund may be redeemed on demand on any dealing day as detailed in the supplement. The price you pay or receive depends on the net asset value per unit on the dealing day when the unit is bought or sold.

Distribution Policy This Unit Class does not distribute dividends and any income and gains will be reinvested in the Unit's net asset value.
