What is this product?

Type

UCITS investment fund in the form of an authorised unit trust.

Term

The Sub-Fund has no maturity date, however the Manager is entitled to terminate the Sub-Fund at any time.

Objectives

Investment objective The Sub-Fund seeks to achieve a superior rate of return by making equity (i.e. shares) and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European Recognised Exchange as listed in the prospectus.

The Sub-Fund aims to achieve its investment objective by investing the majority of its portfolio in large, well-established companies from developed markets in Europe. The Sub-Fund may also invest to a lesser extent in emerging markets from Europe including but not limited to the Czech Republic, Hungary and Poland. The Investment Manager may also invest in smaller companies in either developed or emerging markets, where it believes it will add growth opportunities to the portfolio.

The Investment Manager uses a quantitative model to assess the relative attractiveness of stocks. The quantitative model segments the investment universe into one of six lifecycle categories based on a company's maturity and cyclicity. Stocks are then ranked on a number of factors for each lifecycle category. The ranked output of stocks is then entered into a portfolio optimizer which controls for the targeted tracking error and a number of other constraints in order to construct the portfolio in a manner which seeks to maximize risk-adjusted returns.

The Sub-Fund may use financial derivative instruments ("FDI") for efficient portfolio management (including hedging) purposes only. The Sub-Fund will not use FDI extensively for any purpose.

Share Class Benchmark The benchmark is MSCI Europe Daily Total Return Net Index.

Benchmark The Sub-Fund is actively managed, in reference to a benchmark. The Sub-Fund aims to outperform its benchmark through active risk decisions, while constraining certain variations in risk and portfolio characteristics versus the benchmark. The Sub-Fund targets a material tracking error

against its benchmark which has typically been approximately 2%. The Sub-Fund also aims to limit the active stock, sector and industry weights of the portfolio versus the benchmark. These have historically been in a range of +/- 2%, though will vary over time and are subject to change. The Sub-Fund rebalances versus the benchmark on a monthly basis to reflect fundamental and valuation changes at the stock level while adhering to constraints built into the portfolio optimization process.

Redemption and Dealing This Unit Class of the Sub-Fund may be redeemed on demand on any dealing day as detailed in the supplement. The price you pay or receive depends on the net asset value per unit on the dealing day when the unit is bought or sold.

Distribution Policy This Unit Class does not distribute dividends and any income and gains will be reinvested in the Unit's net asset value.

Intended retail investor

The Sub-Fund is intended for investors who wish to invest in European shares and equity-related securities using a quant strategy, who can bear loss in the short to medium term and have a medium to long term investment horizon, who plan to remain invested for at least 5 years. Investors should be prepared to take on the level of risk identified in the section, 'What are the risks and what could I get in return?' The Sub-Fund is designed to form part of a broadly diversified portfolio of investments, particularly for investors with little past experience of this type of investment.

Practical information

Depositary The depositary of the Sub-Fund is State Street Custodial Services (Ireland) Limited.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies, and whether the share class is hedged or unhedged.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2017 and September 2022.

Moderate: this type of scenario occurred for an investment between April 2019 and April 2024.

Favourable: this type of scenario occurred for an investment between March 2020 and March 2025.

What happens if PineBridge Investments Ireland Limited is unable to pay out?

Investors are unlikely to face a financial loss due to a default of the Manager as the assets of the Sub-Fund are segregated from those of the Manager.

There is no compensation or guarantee scheme in place which may offset any potential loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	1,058 USD	2,091 USD
Annual cost impact*	10.5%	4.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.5% before costs and 2.1% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year

Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	There is no performance fee for this product.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Sub-Fund is designed for investors with a with a medium to long-term investment horizon; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period at the prevailing net asset value, or hold the investment longer. If you redeem at an early stage this will increase the risk of lower investment returns or a loss. Please refer to the PineBridge Global Funds Prospectus and the Sub-Fund's Supplement for further details.
