# PineBridge Global Funds

## Background to the Fund

The following information is derived from and should be read in conjunction with the full text and interpretation section of the most recent prospectus (the "Prospectus") for PineBridge Global Funds (the "Fund").

The Fund is an Irish open-ended umbrella Unit Trust established as an undertaking for collective investment in transferable securities pursuant to Irish Statute comprising the Unit Trusts Act, 1990 (the "Act") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations"), and under The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1) (Undertakings For Collective Investment In Transferable Securities)) Regulations 2019 (the "Central Bank's UCITS Regulations"), and authorised on 4 March 2005 by the Central Bank of Ireland (the "Central Bank").

The Fund is composed of the following Sub-Funds (each a "Sub-Fund" and together the "Sub-Funds") as at 31 December 2024.

- PineBridge Asia Dynamic Asset Allocation Fund\*<sup>†</sup>
- PineBridge Asia ex Japan Equity Fund\*<sup>†</sup>
- PineBridge Asia ex Japan Small Cap Equity Fund\*<sup>†</sup>
- PineBridge Asia Pacific Investment Grade Bond Fund\*<sup>†</sup>
- PineBridge Asian High Yield Total Return Bond Fund\*<sup>†</sup>
- PineBridge China A-Shares Quantitative Fund\*<sup>±</sup>
- PineBridge Europe Research Enhanced Equity Fund\*\*<sup>†</sup>
- PineBridge Global Bond Fund\*\*<sup>†</sup>
- PineBridge Global Dynamic Asset Allocation Fund\*\*<sup>†</sup>
- PineBridge Global Multi Asset Alpha Fund\*\*<sup>±</sup>
- PineBridge Global Emerging Markets SDG Corporate Bond Fund\*\*\*<sup>†</sup>
- PineBridge Global Emerging Markets Focus Equity Fund\*\*<sup>†</sup>
- PineBridge Global Focus Equity Fund\*\*<sup>†</sup>
- PineBridge Greater China Equity Fund\*<sup>†</sup>
- PineBridge India Equity Fund\*\*\*<sup>†</sup>
- PineBridge Japan Equity Fund\*<sup>†</sup>
- PineBridge Japan Small Cap Equity Fund\*<sup>±</sup>
- PineBridge Latin America Equity Fund\*\*<sup>†</sup>
- PineBridge US Large Cap Research Enhanced Fund\*\*<sup>†</sup>
- PineBridge US Research Enhanced Core Equity Fund\*\*<sup>†</sup>
- PineBridge USD High Yield Bond Fund\*\*<sup>±</sup>
- PineBridge USD Investment Grade Credit Fund\*\*<sup>†</sup>

The Transfer Agent dealing cut off is 12.00 noon GMT on Valuation Day for all Sub-Funds.

PineBridge Global Emerging Markets SDG Corporate Bond Fund has been prepared on a non going concern basis due to its termination on 17 January 2024.

PineBridge China A-Shares Quantitative Fund has been prepared on a non going concern basis due to its termination on 30 September 2024.

\*Trade receipt deadline 11:30am GMT on Valuation Day, 31 December 2024 for the Annual Accounts.

\*\*Trade receipt deadline 7:30pm GMT on Valuation Day, 31 December 2024 for the Annual Accounts.

\*\*\*Trade receipt deadline 1.00pm GMT on Valuation Day, 31 December 2024 for the Annual Accounts.

<sup>†</sup>Sub-Funds registered with the Securities and Futures Commission in Hong Kong.

<sup>±</sup>Sub-Funds not authorised in Hong Kong and not available to the public in Hong Kong.

All Sub-Funds are available for sale in Germany. Fund documentation (Key Information Document ("KID"), Prospectus, Trust Deed, Semi-Annual and Annual Accounts) and information on issue and redemption of prices are available from the office of the German Paying/Information Agent.

Each of the Sub-Funds which are registered with the Securities and Futures Commission (the "SFC") in Hong Kong are regulated under an equivalent jurisdiction in the form of the UCITS Regulations. While the SFC recognises that annual reports of recognised jurisdiction schemes will vary in content, annual reports are expected to offer investors comparable disclosure.

## Background to the Fund (continued)

PineBridge Emerging Europe Equity Fund has terminated operations on 7 December 2022 and is pending revocation by the CBI. Termination financial statements continue to be prepared for PineBridge Emerging Europe Equity Fund as the Sub-Fund still holds residual cash balances and Russian securities and Russian cash with a market value of \$Nil as of the Statement of Financial Position date.

The following Sub-Funds have terminated operations in prior years and are pending revocation by the CBI. As the Sub-Funds still hold residual cash, Statement of Financial Position continues to be prepared for these Sub-Funds:

- PineBridge Global Emerging Markets Local Currency Bond Fund
- PineBridge Global Emerging Markets Bond Fund

PineBridge Investments Ireland Limited (the "Manager") may create additional Sub-Funds, with the prior approval of the Central Bank and the Trustee. Each Sub-Fund will bear its own liabilities and shall not bear the liabilities of any other Sub-Funds.

The Prospectus, KIIDs, the semi-annual report and the annual report as well as a list of the portfolio changes during the financial period can be obtained free of charge from the Manager or from the Swiss Representative and Paying Agent.

## Investment Objectives

The assets of each Sub-Fund will be invested separately in accordance with the investment objectives and policies of the relevant Sub-Fund as set out in the Prospectus and outlined in each Investment Manager's Report. Material changes to the investment objectives of each Sub-Fund will not be made without unitholder approval and in the event of any such change, notice will be given to unitholders to enable them to redeem their units before the changes take effect.

## Calculation of Net Asset Value

The Net Asset Value (the "NAV") per unit is calculated for each Dealing Day by dividing the value of the assets of the relevant Sub-Fund less its liabilities to include a provision for duties and charges, by the number of units then outstanding. The value of the underlying assets is adjusted for accrued income and liabilities excluding management fees, unitholder servicing and maintenance fees (as appropriate) and other Class specific charges, where applicable. It is then allocated between the various Classes based on their pro rata closing NAVs as of the previous Dealing Day. Where applicable, Class currency hedging impact is applied to the relevant unit Class. The management fee, the unitholder servicing and maintenance fee (as appropriate) and other Class specific charges are then applied to each Class.

The NAV of each Sub-Fund is calculated in the Functional Currency of that Sub-Fund. For Sub-Funds with Classes denominated in a currency other than the Functional Currency, the NAV of such Classes is translated to the relevant Sub-Fund currency. The NAV per unit for each class is available on [www.pinebridge.com](http://www.pinebridge.com).

## Irish Funds Corporate Governance Code

The Irish Funds ("IF"), in association with the Central Bank has published a corporate governance code (the "Code") to be adopted by Irish authorised collective investment schemes. The Board of Directors of the Manager voluntarily adopted the code effective from 31 December 2012 and the Fund operates in full compliance with the Code.

## Significant Events During the Financial Year

PineBridge Global Emerging Markets SDG Corporate Bond Fund terminated on 17 January 2024.

Please see Note 11 for details of share class launches and terminations during the financial year.

The continued Russian engagement in military actions across Ukraine may still affect the Sub-Funds over the coming period as it will continue to cause instability on the global and European markets. The Investment Manager is leveraging established risk frameworks as the crisis in Ukraine continues to evolve. To maintain the protection and security of client assets, the Investment Manager is closely monitoring for any emerging risks impacting portfolios and will continue to monitor this situation and take appropriate actions as needed.

Please be informed PineBridge Investments Ireland Limited changed its registered office on 1 May 2024.

An updated prospectus was issued by the Fund along with updated supplements on 27 November 2024.

The prospectus supplement for PineBridge Global Multi Asset Alpha Fund was updated on 29 November 2024 to reflect the addition of new share classes.

There have been no other significant events affecting the Fund during the financial year.

### Significant Events Since the Financial Year End

Since the financial year end, the following Sub-Funds had material redemptions:

- PineBridge Asia ex Japan Small Cap Equity Fund - 33.07% of the Net Asset Value;
- PineBridge Asia Pacific Investment Grade Bond Fund - 21.21% of the Net Asset Value;
- PineBridge Global Dynamic Asset Allocation Fund - 35.34% of the Net Asset Value;
- PineBridge Japan Small Cap Equity Fund - 29.54% of the Net Asset Value; and
- PineBridge USD Investment Grade Credit Fund - 21.91% of the Net Asset Value.

The Investment Manager is not aware of any specific reason(s) for the redemption(s) and there are no liquidity issues meeting redemptions. The Sub-Funds remain actively marketed products for PineBridge Investments, and there are no going concern issues.

There have been no other significant events affecting the Fund since the financial year end.

## Investment Manager's Report

### PINEBRIDGE ASIA EX JAPAN EQUITY FUND

#### Portfolio Objective

PineBridge Asia ex Japan Equity Fund seeks long-term capital appreciation by investing in equity and equity related securities of companies whose assets, product or operations are in the Asian Region. The Sub-Fund may also, to a lesser extent, invest in equity-related securities of companies whose assets, products or operations are in Australia and New Zealand.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Asia ex-Japan Equity Fund Class "A", "A5H", "C", "L", "Y" and "Z" returned 2.09%, 0.07%, 1.63%, 2.65%, 2.91%, and 3.94% respectively. Over the same period, the benchmark index, MSCI All Country Asia ex Japan Daily Total Return Net (USD) and (SGD) returned 11.96% and 15.79% respectively.

#### Portfolio Overview

2024 was an eventful year in Asia and globally. The gap between the best and worst performing major market was the widest since 2009. Over the course of the year, there were 3 major drawdowns and 3 major rallies. Asian equities started the year strongly led by technology names with optimism around strong artificial intelligence (AI) chips with Taiwan leading the charge. Similarly, the excitement around AI supported the semiconductor names in Korea, followed by the Value-UP Program, while Chinese equities saw significant volatility due to weak economic data and delay in stimulus supporting the economy. In April, the higher-for-longer interest rate paused the rally. In early August, the unwinding of carry trades in Japan and recession scare sent a shock wave to the Asian equities. However, the market quickly recovered from that. In mid-September, there was third major rally as policy pivot in China sharply raised stimulus expectations, leading to the biggest one-month rally in China equity since 2008 financial crisis. Unfortunately, the rally stalled as the policies announced by the Chinese government were below market expectations and geopolitical tension between US-China was rising after Trump was re-elected as the US President.

Taiwan and Singapore were the best performing markets in 2024. Taiwan outperformance was led by AI related names, particularly in the first half 2024. Similarly, the outperformance in Singapore was led by the Singaporean banks delivered better than expected earnings. On the other hand, Korea which is also a technology heavy country saw a drawdown of more than 23% for the year, as the largest memory company in Korea facing structural operational issue, coupled with additional challenges from domestic political turmoil heightened market uncertainties. ASEAN (association of southeast Asian nations) equities, especially twin-deficit markets like Indonesia and Philippines generated negative return as they were under pressure as the USD strengthened.

The sub-fund underperformed the index for 2024. By geography, our stock selection in China and Taiwan detracted the fund performance. While our stock selection in Hong Kong and India contributed to the performance. By sector, stock selection in information technology and consumer staples detracted the performance while our stock selection in industrials and materials contributed to the performance.

#### Portfolio Outlook

Despite the higher for longer-for-longer stance from the US Fed, we like Indonesia, Malaysia and Philippines as these countries are trading at attractive valuations with decent earnings growth and we believed a lot of concerns are priced in. We have started to turn more positive in Singapore as its earnings are resilient in current global economic backdrop.

We remain cautious in China as economy recovery is not insight, and deflation is not hitting inflection point anytime soon as more supportive measures are needed from the government. Additionally, US-China tension may rise further following US Presidential inauguration. Our stance on India remains guarded on the back of hefty valuation, coupled with capex spending started to slow.

## Investment Manager's Report (continued)

### PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND

#### Portfolio Objective

PineBridge Asia ex Japan Small Cap Equity Fund seeks long-term capital appreciation by investing in smaller to medium-sized companies in the Asian Region, i.e. companies whose assets, products or operations are in the Asian Region. In practice, at least 50% of the Sub-Fund's investment will be in companies whose free float adjusted market capitalisation at the time of purchase is less than USD \$1.5 billion.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Asia ex Japan Small Cap Equity Fund Class "A", "A5CP", "Y", "A12", "A5", "R", "R1", "R1H", "R2", "R2D", "R2HD", "SR", "SR1", "SR1H", "SR2D", "SR2DH", "Y1H", "Y2", "Y2HD" and "YD" returned 0.40%, 3.81%, 1.21%, 9.86%, 3.50%, 1.31%, 7.69%, (0.51%), 2.82%, 2.82%, 0.68%, 1.46%, 7.86%, (0.29%), 2.98%, 0.89%, (0.54%), 2.72%, 0.65% and 1.21%, respectively. Over the same period, the benchmark index, MSCI All Country Asia Pacific ex Japan Small Cap Daily Total Return Net Index (EUR), (GBP), (SEK), (SGD) and (USD), returned 11.88%, 6.74%, 14.98%, 8.46%, and 4.87% respectively.

#### Portfolio Overview

The year 2024 was a dynamic and eventful period for Asia ex-Japan equities, characterised by a combination of opportunities and challenges that demanded cautious navigation from investors. Against a backdrop of evolving macroeconomic policies and geopolitical developments the region's markets experienced significant fluctuations, underscoring the need for a disciplined and strategic investment approach. The year started on a modestly positive note, with first quarter index performance led by technology names with optimism around strong AI chips with Taiwan and Korea leading the charge. Conversely, China faced headwinds as property sector challenges, subdued fiscal measures, and concerns over long-term growth kept investors cautious. Going into the second quarter, the index continued to see gains led by India and Taiwan. India's favorable election results brought political stability and boosted foreign inflows while Taiwan continued to benefit from AI demand and restocking in electronics. On the other hand, China's consumption recovery remained subdued despite announcement of fresh supportive policy measures. Further into the year, the Asian equities benefitted from some of the key announcements in September. The US Federal Reserve (Fed) cut interest rates by 50 bps in the September meeting after a long anticipation. The rate cut along with improving inflation in the region supported sentiment on the equities and provided room for some of the markets to consider monetary easing. China equity market saw a sharp pick up towards the end of the quarter after its central bank implemented policy easing measures to stabilize the property sector and boost economic growth, reassuring investors. Meanwhile, Korea and Taiwan faced setbacks, with profit-booking in information technology (IT) stocks and uncertainty in AI related demand weighing on performance.

The year ended on a more challenging note in fourth quarter, with the Index declining 8.53% amid volatility. The quarter saw a market response to the incoming Trump administration, as growing concerns over President-elect Donald Trump's potential imposition of tariffs raised fears of negative impact on export-driven economies in Asia Ex-Japan region. Rising U.S. Treasury yields and anticipation of a modest rate cut outlook by the US Fed further dampened sentiment. For China, the delay in targeted fiscal policy announcements and weak consumption kept investors cautious. Concerns over potential U.S. import tariffs and the yuan's depreciation in December further added to the uncertainty.

Despite the hurdles, resilience in markets like India, Malaysia and Taiwan highlighted selective opportunities amid a year of heightened global and regional uncertainties.

The sub-fund underperformed the index for 2024. By geography, our stock selection in Taiwan and India detracted the fund performance. While our stock selection in Korea and Australia contributed to the performance. By sector, stock selection in financials and consumer staples detracted the performance while our stock selection in industrials and information technology contributed to the performance.

## Investment Manager's Report (continued)

### PINEBRIDGE ASIA EX JAPAN SMALL CAP EQUITY FUND (continued)

#### Portfolio Overview (continued)

By stock, an Indian Electronic Manufacturing Services (EMS) provider outperformed in quarter 4 2024 as well as calendar year 2024 (CY24) due to strong growth in revenue, driven by existing as well as new clients. Efficient cost management as well as operational gains led to expansion in margin. Another holding, a Malaysian construction player outperformed on the back of improving data centers and infrastructure orderbook outlook. On the other hand, a Chinese pharmacy underperformed due to the market concerns over policy uncertainty and therefore the fierce price competition for the industry. Another holding, a cement manufacturer in India underperformed due to demand slowdown as well as margin compression as the industry was not able to take price hikes.

#### Portfolio Outlook

Going into 2025, we expect volatility for the equities to persist on the back of uncertainty over potential changes to trade policies as Trump government takes office. Rising US Treasury yield and thus stronger U.S. dollars would increase volatility of Asia ex-Japan currencies, which in turn would impact fund flows to the region. It will be important to watch how each Asian economies develop tailored policy strategies to navigate external challenges while sustaining domestic demand.

For China, a sustainable recovery will depend on stabilising its ailing property market, reforming its fiscal system and defending against the geopolitical tensions. While the attractive valuations continue to draw investor interest, caution remains as they wait for more concrete fiscal policies. While we continue to monitor macro developments and stay flexible in portfolio construction, we maintain a disciplined investment strategy. We focus on high-quality stocks with a long-term horizon, ensuring each decision is backed by solid company fundamentals, with an aim to navigate market fluctuations and achieve sustainable long-term returns.

**PineBridge Investments Asia Ltd.**  
**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND

#### Portfolio Objective

The investment objective of PineBridge Asia Pacific Investment Grade Bond Fund is to provide investors with stable return and long-term capital growth through investment in a wide range of investment grade debt securities within the Asia Pacific Region.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Asia Pacific Investment Grade Bond Fund Class "A", "A5HD", "ADC", "R", "RD", "SR", "SR1H", "SR1HD", "SR2HD", "SR5HD", "SRD", "W", "W5H", "W5HD", "W5HDC", "WD", "WDC", "X", "Y", "Y1H", "YD" and "Z5H" returned 4.01%, 2.05%, 4.01%, 4.70%, 4.69%, 5.01%, 3.44%, 3.44%, 4.82%, 3.04%, 5.01%, 4.39%, 2.40%, 2.40%, 2.41%, 4.38%, 4.41%, 5.11%, 4.69%, 2.95%, 4.69% and 3.32% respectively. Over the same period, the benchmark index, the JP Morgan Asia Credit (JACI) Investment Grade Total Return (SGD), (USD), (EUR hedged), (EUR unhedged) and (GBP) returned 2.25%, 4.22%, 2.48%, 11.18% and 3.85% respectively.

#### Portfolio Overview

##### First Quarter

China's People's Bank of China (PBoC) announced a 25 basis points (bps) cut on the 5-year loan prime rate (LPR), which marks the largest cut ever made since LPR was rolled out in 2019. Elsewhere, the Bank of Japan (BoJ) adjusted its monetary policy largely in line with market expectations.

Asia investment grade credit spreads tightened in the first quarter of the year with the primary market remaining relatively subdued. Credit fundamentals continue to hold up well, as evidenced by the latest earnings season.

##### Second Quarter

The USD Asia investment grade market had positive returns in the second quarter, driven by a decline in rates and tighter spreads. The economic environment in Asia remains generally healthy.

##### Third Quarter

A hawkish tone from the BoJ in August caused an initial sell-off in risk assets but stability returned quickly after that. In China, policymakers further eased monetary policy and announced stimulus measures to stabilise the economy.

Asian investment grade spreads were relatively unchanged quarter-on-quarter, but volatility was experienced with spreads widening in the early part of the quarter before recovering strongly in the second half.

##### Fourth Quarter

Spreads traded generally sideways with a tightening bias. Issuance continued to be scarce, although Japanese and Australian issuers saw a pick-up of issuance throughout the year.

#### Portfolio Outlook

As we enter the new year, we expect to see a pick-up in new issuance before the lunar new year period towards the end of January. We also expect investors to continue positioning for the second Trump administration which is expected to bring in trade protectionist policies. Except for a few issuers, we believe that Asian investment grade issuers are largely insulated from potential trade tariffs. While we expect a period of political uncertainty in South Korea, we believe that the worst of the volatility is behind us and Korean credits should be relatively unscathed by the events.

## Investment Manager's Report (continued)

### PINEBRIDGE ASIA PACIFIC INVESTMENT GRADE BOND FUND (continued)

#### Portfolio Outlook (continued)

We think the Japanese economy will grow at close to or above potential this year, which will continue to support fundamentals of Japanese issuers broadly. We remain of the view that Chinese economic growth this year will be tepid. While we do not discount further measures to stimulate the economy, we expect those measures to be targeted. Despite the risk of tariffs, we expect most Southeast Asian economies to perform well this year. While India is going through a cyclical downturn, we think its economic prospects remain strong.

We expect credit spreads to range trade from current levels, and corporate fundamentals are expected to remain stable on average.

**PineBridge Investments Asia Ltd./PineBridge Investments Singapore Ltd.**

**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE ASIAN HIGH YIELD TOTAL RETURN BOND FUND

#### Portfolio Objective

The investment objective of PineBridge Asian High Yield Total Return Bond Fund is to maximize total return by primarily investing in high yielding, sub-investment grade debt securities of issuers domiciled in or exercising a predominant part of their economic activities in the Asia Pacific Region.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Asian High Yield Total Return Bond Fund Class "Z", "A", "A5HD", "XD", "Y" and "Y1HD" returned 11.51%, 10.00%, 7.83%, 11.28%, 10.78% and 9.03% respectively. Over the same period, the benchmark index, the JP Morgan Asia Credit Non-Investment Grade Total Return Index (EUR), (USD) and (SGD) returned 13.39%, 15.18% and 19.12% respectively.

#### Portfolio Overview

Asia high yield credit market delivered strong performance in 2024, with the J.P. Morgan Asia Credit Non-Investment Grade Index posting a total return of +15.18%. Performance has been predominately driven by spread compression and carrying, with credits in the lower rating buckets outperforming and rebounding from very distressed levels. That said, the BB-rated segment also delivered a decent total return at +12.2%. Frontier sovereigns delivered +26.2% total return, outperforming the corporate sector. Overall, macroeconomic trends in the region were largely consistent with expectations. During the year, China's economic data remain mixed, and policy makers continued to introduce measures aimed at alleviating the downside pressure. In other areas of Asia, the economic conditions have remained relatively favorable. Election outcomes in various regions were conducive towards overall policy continuity. Asia high yield corporate default rates further declined as the China property sector continued to shrink while the other segments generally maintained healthy credit fundamentals with Asia ex-China property HY corporate default rate staying below 1% in 2024. The sub-fund underperformed the benchmark primarily due to lack of exposure to the distressed credits (e.g. Sri Lanka and Pakistan).

#### Portfolio Outlook

Default rates declined for a second straight year over 2024, and this trend is expected to continue into 2025 as the China property sector further shrinks and fundamentals for the remaining segments remain broadly stable. Geopolitical and monetary policy risks look elevated going into 2025, and there will be a spotlight on the implications of the second Trump administration policy on this region. Potential tariff increases are expected to be a headwind for economic growth in certain regions, most notably in China, although fundamental impacts for Asian credit issuers are manageable, with very few USD bond issuers having major direct exposures to the US. In China, recent stimulus in 2024 has fallen short of market expectations, and we remain of the view that policymakers will not be releasing any stimulus "bazooka" to resolve current economic challenges. That said, we do believe Beijing's efforts to manage downside growth and contain systemic risks is positive for credit markets and particular sectors. In 2025 we think policymakers will continue to use various levers at their disposal to manage the slowdown, though we expect any moves to be generally targeted and selective. Within Chinese corporates, we continue to remain highly selective within the property sector, and we prefer select industrial names that are benefitting from pro-growth and loose monetary policy. Away from mainland China, broader fundamental trends of high yield issuers continue to look constructive and overall default rates are expected to remain very low. After a very strong performance for the asset class in 2024, the asset class continues to offer attractive yields relative to other major credit markets, particularly in light of the low and still declining default rate backdrop. We are currently favoring select consumer credits (including the gaming sector), renewable energy credits, and corporates with good access to cheaper local funding channels.

**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND

#### Portfolio Objective

PineBridge Europe Research Enhanced Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies whose assets, products or operations are located in Europe. Up to 10% of the value of the Sub-Fund may be invested in other companies which are listed on a European recognised Stock Exchange.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Europe Research Enhanced Equity Fund Class "A", "L" and "Y" returned (1.94%), (1.70%) and (1.01%) respectively. Over the same period, the benchmark index, the MSCI Europe Daily Total Return Net Index (USD) returned 1.79%.

#### Portfolio Overview

Euro-zone inflation eased less than anticipated at the start of the year. At this point, most Euro area countries still have inflation over 2%. Italy is the largest economy with under 2% inflation thus far. Italy and Spain have shown the highest quarter on quarter (QoQ) change in GDP relative to their counterparts, with Germany showing a negative QoQ change. The Euro area change in GDP was flat for Quarter 4, coming off a negative Quarter 3. The Euro area labor market remains resilient. Economic data in Europe was positive in February, with German manufacturing continued to show considerable weakness due to order backlogs, poor factory sales and manufacturing profits which have been lagging the rest of Europe. The Euro area composite purchasing managers index (PMI) rose overall, while some countries showed mixed results. Euro area services inflation continues to huddle above the European Central Banks (ECB's) target as Core goods inflation has improved. European cyclicals have re-rated to expensive vs defensive in the last 2 months as well. The gap between Euro area manufacturing PMI (%y/y) and European cyclicals vs Defensives (%y/y) is still wide, indicating that the market is far from pricing in a risk of a downturn so far. Europe proved to have the strongest returns in March as Spain, Italy, and the United Kingdom outpaced the broader regional market averages. The UK market rallied as takeover speculation, and a high dividend yield attracted investors. In Europe, risk measures were mixed with higher beta stockout performing whereas more volatile stocks were not in favor. While some European equity indexes, such as the French CAC 40, reached new all-time highs, with the MSCI Europe ex-UK Index posting returns of 9.7%. The MSCI Europe Total Return Index was down (1.89%) in April. The European Central Bank kept rates unchanged in April, while signaling that they will begin cuts in June. Overall, defensives outperformed cyclicals in April. The Euro area composite PMI increased in April, potentially providing support to manufacturing companies. Our Valuation cluster outperformed in April, while sentiment underperformed. Quality remained flat throughout the month. Year-to-date, Valuation has performed the best. European growth-factor stocks outperformed in May, while the benchmark total return was 4.84%. Defensive sector performance within the benchmark was positive in May. On a cap-weighted basis, the top model quintiles outperformed while the bottom model quintile underperformed. This pattern was reflected on an equal-weighted basis as well. All three clusters outperformed, with Valuation consistently positive throughout the month. Both sentiment and quality slightly dipped halfway through the month, but rebounded in the second half of the month, with sentiment showing stronger returns. European equity markets were weak this month, as the benchmark return was (2.25%).

Eurozone equities fared well at the beginning of the month, until dropping due to political uncertainty. French and U.K. elections sparked volatility in the market. Generic momentum factors outperformed Europe in June. On a cap-weighted basis, the top model quintiles outperformed or were slightly negative. Bottom model quintiles underperformed on a cap-weighted basis. This pattern was exacerbated when looking at model quintile returns. Sentiment and quality clusters outperformed this month, while valuation underperformed throughout the month. The model cumulative returns were slightly negative throughout the month but finished the month positively.

European equity markets were positive this month, as the benchmark return was 2.15% after a weak June. July saw some reversal in the European equity market compared to previous months. Generic dividend and reversal factors were up during the month. On a cap-weighted and equal-weighted basis, the top model quintile outperformed. Valuation's top quintile outperformed while its bottom quintile underperformed on a cap-weighted basis. The model cumulative returns were flat throughout the month, starting off positively and finishing the month slightly negatively. In the second half of the month, valuation outperformed, while sentiment remained positive. Quality was negative throughout the month.

## Investment Manager's Report (continued)

### PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND (continued)

#### Portfolio Overview (continued)

The European equity market was up 3.94% in August, despite a volatile beginning due to the carry-trade reversal. Generic momentum, quality and size factors were up in August. On a cap-weighted and equal-weighted basis, sentiment and quality's top quintiles outperformed. Their bottom quintiles underperformed on both a cap-weighted and equal-weighted basis as well. The model cumulative returns were positive in the second half of the month, as the sentiment cluster picked up as well. Valuation was negative throughout the month but showed signs of picking up towards the end. Quality was positive throughout the month. The European equity market was up although muted compared to last month with a total return at 39 bps. Generic reversal, sentiment and valuation metrics were up during the month, with reversal outperforming the most. Both quality and sentiment factors were up during the month, with quality performing flat towards the end of the month. Valuation was down in the first half of the month but then improved halfway through.

Generic momentum, quality and size factors were up in September. On a cap-weighted and equal-weighted basis, sentiment and valuation's top quintiles outperformed. The European equity market was down this month as heightened uncertainty generic momentum and size factors were up during the month, with momentum outperforming the most. Momentum and size factors have outperformed the most year to date (YTD) as well. Our valuation and sentiment clusters outperformed throughout the month, while quality cluster performance was flat this month. Sentiment outperformed the most, with top model deciles outperforming and bottom model deciles underperforming on a cap and equal weighted basis. Overall, the research enhanced (RE) model was positive this month. The European equity market was slightly up in November as heightened uncertainty generic momentum, quality, and revision factors outperformed during the month, with generic Momentum outperforming the most. Generic momentum has outperformed YTD. Our Sentiment cluster was up this month with consistently positive returns, while Valuation declined halfway through the month. Our Quality cluster performance was slightly negative in the beginning of the month but improved halfway through the month. The Sentiment cluster's low ranked model quintiles underperformed, while its top quintiles outperformed, on both a cap and equal-weighted basis.

Overall, the RE model was positive this month. The MSCI Europe Total Return Index was down this month. During the December 2024 meeting, ECB's indicated the disinflation process was on track. Generic Volatility factor outperformed during the month and generic Size and Momentum factors underperformed. Our Valuation cluster was up this month with consistently positive returns, while Quality and sentiment were flat in the middle of the month and slightly underperformed the rest of the month. The Valuation cluster's top quintiles outperformed on both a cap and equal-weighted basis. Overall, the RE model was positive this month.

#### Portfolio Outlook

During the December 2024 meeting, ECB indicated the disinflation process was on track. Markets continued to price at least four ECB rate cuts in 2025 to bring the deposit rate to close to 2%. Sectors such as financial and consumer-facing areas that are normally benefited from lower interest rates are expected to outperform. Potential tariff policies implemented by the incoming administration of the US may affect export numbers and may pose questions around if there will be another round of trade wars. Our sentiment and quality clusters outperformed throughout the year 2024 and generic momentum factors also outperformed. We remain positive on our quality and sentiment clusters.

**January 2025**

# PineBridge Global Funds

## Investment Manager's Report (continued)

### PINEBRIDGE EUROPE RESEARCH ENHANCED EQUITY FUND (continued)

#### Portfolio Outlook (continued)

### PINEBRIDGE GLOBAL BOND FUND

#### Portfolio Objective

PineBridge Global Bond Fund seeks a high level of return from a combination of current income and capital appreciation by investing in a portfolio of debt securities denominated in US Dollars and a range of other currencies including, Euro, Australian Dollar, New Zealand Dollar, Canadian Dollar, Swiss Franc, Danish Krone, Swedish Krona, Norwegian Krone, British Sterling, Japanese Yen, Polish Zloty, Hungarian Forint, South African Rand, Singapore Dollar, Slovak Koruna and Mexican Peso.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Global Bond Fund Class "A", "X7H" and "Y" returned 0.66%, (2.27%) and 1.67% respectively. Over the same period, the benchmark index, the Bloomberg Global Aggregate Total Return Index (USD Hedged) and (CHF) returned 3.40% and (1.01%) respectively.

#### Portfolio Overview

2024 was another strong year for risk, as economic growth surprised on the upside and central banks finally began to cut rates. That meant the S&P 500 posted a total return of +25%, marking the first time since the late-1990s where it's achieved back-to-back annual returns above 20%. Similarly, credit spreads tightened further in both sides of the Atlantic with the US corporate index reaching levels not seen in over ten years. Moreover, the US exceptionalism narrative helped push the US Dollar to its strongest annual close since 2001.

Yet despite the generally upbeat performance, there were plenty of bumps along the way. Rate cuts took longer than many expected, meaning that sovereign bonds struggled to gain traction. In fact, the 10yr Treasury yield rose for a 4th consecutive year, which is the first time that's happened since the 1980s. Political developments also caused several wobbles, particularly around April as tensions in the Middle East escalated. Over in France, the country's assets underperformed amidst the political uncertainty. And there was huge (albeit brief) market turmoil in the summer, as weak US data and a BoJ rate hike led to the unwinding of the yen carry trade. So, with quite a few concerns still in the background, gold prices posted their strongest annual gain since 2010.

The sub-fund underperformed (gross of fees) its benchmark, the Bloomberg Global Aggregate Total Return Index (USD Hedged), during the annual reporting period ending 31st December 2024. The sub-fund's relative underperformance was driven mainly by yield curve positioning, slightly offset by positive contribution from security selection.

#### Portfolio Outlook

After the strong win from Trump and the Republican party, US policy should be a big driver of financial markets in the coming months. Taxes, tariffs, immigration, inflation and foreign policy are just some of the areas on Trump's agenda that could have a material impact in the US and world economy. We are still waiting for further details to make a better forecast of their impact; having said that, we are of the view that Trump's policies should help US growth at the expense of Europe and China. For this reason, we favor the rate markets in Europe (including the UK), while we like the USD even after its recent strong move. We still like credit markets but will be selective of sectors and issuers depending on the impact from the US policy. Central banks will continue with their rate cut cycle although the pace and length of the cycle will drive markets as well. Overall, we do not expect volatility to decrease and could see the market narrative change a few times over the next six months

**PineBridge Investments Europe Ltd.**  
**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL DYNAMIC ASSET ALLOCATION FUND

#### Portfolio Objective

PineBridge Global Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing worldwide economic and investment trends and investing in assets globally to benefit therefrom.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Global Dynamic Asset Allocation Fund Class "A", "A5H", "AA", "ADC", "ADCT", "C", "Y", "Y1H", "Y2H" and "Y5H" returned 4.42%, 2.32%, 4.47%, 4.42%, 4.42%, 4.21%, 5.52%, 3.61%, 4.99% and 3.39% respectively.

#### Portfolio Overview

Global stock markets surged in 2024, driven by robust economic growth, easing inflation, and interest rate cuts by major central banks. US markets led the way, with exceptional performance in technology and economic resilience, while Europe and emerging markets posted smaller gains, hindered by China's economic struggles and elevated energy costs. Bonds faced volatility as rising government yields and unexpected inflation in the latter half of the year dampened investor optimism for rate cuts.

Markets remained narrowly focused, with mega-cap tech names tied to generative AI delivering outsized returns. We began the year with a constructive outlook on markets, positioning the strategy for a high probability of a soft landing amid slowing growth and inflation. As downside risks continued to diminish and our conviction strengthened, supported by both data and policy actions, we progressively increased risk exposure throughout the year. Our strategy benefited from effective risk positioning, particularly as we aligned with a risk-on environment favoring equities over credit and rates. However, not owning enough of the mega-cap tech names limited our total return. Currency positioning was the largest detractor, as virtually all currencies weakened against the dollar. Rates positioning, which was concentrated in the US, also underperformed as central banks outside the US eased more aggressively. Gold, added late in 2023, outperformed equities, buoyed by geopolitical tensions, declining real yields, and strong central bank demand from the Global South.

#### Portfolio Outlook

Recent progress on disinflation in the US has flatlined. Some categories of goods that had overshot to the downside into deep but temporary deflation are now normalising, just as some slower moving yet larger categories of services, such as shelter and car insurance, have begun to break to the downside. Absent policy changes from the new Trump administration, we expect the net effect of these forces to be a flatlining of disinflation for a few more months before it resumes in earnest. This isn't to say that campaign declarations on tariffs and immigration, if pursued dogmatically, couldn't turn a disinflationary opportunity into a reflationary problem. However, we expect a scaled-down and stretched-out version of such policies alongside pursuit of other approaches to trade resets, extending today's flatlining likely until midyear, when a continued stair-step down in disinflation ensues. In the midst of this, with markets on edge, the Fed revised its inflation forecasts up in what looks like an overreaction to these base effects, plus some padding of the forecast in case the upcoming policy changes impede progress toward disinflation more meaningfully. It's not just the Fed. In response to the threat of tariffs, China will initiate fiscal stimulus soon, which will add modest upward pressure on industrial commodity prices. We see this confluence of temporary reflationary pressures as a potential buying opportunity should market participants get head-faked on this reflation, just before disinflation recommences and productivity increases in the second half of 2025. As investors focused on the intermediate term, we are maintaining our constructive risk dial score (RDS) of 2.5, with a predisposition to add more risk should markets correct.

**PineBridge Investments Europe Ltd./PineBridge Investments LLC**  
**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL MULTI ASSET ALPHA FUND

#### Portfolio Objective

PineBridge Global Multi Asset Alpha Fund seeks to deliver a positive return over the medium to long term in all market conditions.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Global Multi Asset Alpha Fund Class "Z" returned 4.93%. For the year 10th December to 31st December 2024, the PineBridge Global Multi Asset Alpha Fund Class "Y" and "YY" returned 0.39%.and 0.43% respectively.

#### Portfolio Overview

The sub-fund's primary focus is to deliver consistent and attractive risk-adjusted returns that remain uncorrelated with traditional risk drivers such as equities, interest rates, and credit. This is achieved through a unique and dynamic asset allocation process that employs long/short pairings across a diverse range of asset classes, including equities, fixed income, listed alternatives, commodities, and currencies. This utilises a dynamic beta layer as a secondary alpha driver.

Global stock markets delivered strong gains, driven by robust economic growth, declining inflation, and interest rate cuts by major central banks. However, market performance was characterised by narrow leadership, with US technology and economic strength dominating, while Europe and emerging markets lagged due to China's weakness and high energy costs. In contrast, bonds faced volatility as rising government yields and sticky inflation, particularly outside Europe, tempered expectations for further rate cuts. While the sub-fund delivered positive returns with low correlations to stock and bond markets, it fell short of its ambitious return objective due to insufficient alpha generation from allocation pairs. After three consecutive quarters of positive performance, the sub-fund experienced a correction early in the fourth quarter, driven by idiosyncratic factors. The largest detractor was a pair trade featuring a long position in enterprise focused, productivity enhancing software and a short position in expensive/overvalued technology companies with weak fundamentals. Expectations of easing monetary policy and anticipated deregulation disproportionately boosted the short side of this trade, as increased liquidity and risk appetite lifted these companies. In response, we restructured the pair in November to reduce exposure to cyclical noise while maintaining focus on structural trends.

#### Portfolio Outlook

Recent progress on disinflation in the US has flatlined. Some categories of goods that had overshot to the downside into deep but temporary deflation are now normalising, just as some slower moving yet larger categories of services, such as shelter and car insurance, have begun to break to the downside. Absent policy changes from the new Trump administration, we expect the net effect of these forces to be a flatlining of disinflation for a few more months before it resumes in earnest. This isn't to say that campaign declarations on tariffs and immigration, if pursued dogmatically, couldn't turn a disinflationary opportunity into a reflationary problem. However, we expect a scaled down and stretched out version of such policies alongside pursuit of other approaches to trade resets, extending today's flatlining likely until midyear, when a continued stair-step down in disinflation ensues. In the midst of this, with markets on edge, the Fed revised its inflation forecasts up in what looks like an overreaction to these base effects, plus some padding of the forecast in case the upcoming policy changes impede progress toward disinflation more meaningfully. It's not just the Fed. In response to the threat of tariffs, China will initiate fiscal stimulus soon, which will add modest upward pressure on industrial commodity prices. We see this confluence of temporary reflationary pressures as a potential buying opportunity should market participants get head-faked on this reflation, just before disinflation recommences and productivity increases in the second half of 2025. As investors focused on the intermediate term, we are maintaining our constructive RDS of 2.5, with a predisposition to add more risk should markets correct.

PineBridge Investments Europe Ltd./PineBridge Investments LLC

January 2025

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND

#### Portfolio Objective

PineBridge Global Emerging Markets Focus Equity Fund seeks to achieve a relatively high rate of growth, on a long-term basis, through careful selection of equity and equity-related securities in global Emerging Markets whilst seeking to protect the Sub-Fund from downside risk.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Global Emerging Markets Focus Equity Fund Class "A", "Y" and "Z" returned 2.73%, 3.55%, and 4.59% respectively. Over the same period, the benchmark index, the MSCI Emerging Markets Daily Total Return Net Index (USD) returned 7.50%.

#### Portfolio Overview

MSCI GEM index advanced 7.97% in 2024, behind the +19.22% of the MSCI World. The year began with the expectation that the US would commence interest rate cuts, and that some emerging markets would begin reducing interest rates due to the lower consumer price index (CPI). The outlook for AI related demand remained strong and semiconductor chip prices were forecast to increase. There were also concerns about trade relations between US and China and the two ongoing wars. As the year began, the markets realised that the speed and magnitude of US easing would be less than projected. In some countries, especially Brazil and Mexico, lack of fiscal discipline caused a change in the rate cut outlook and weakened their domestic currencies.

As a result of the above, in quarter 1 the year began with the benchmark's decline, but recovered later in the quarter and saw a gain of 2.36%. Given the investors' skittishness, their reaction at times became very negative to the slightest disappointment. The markets would send the shares down significantly even when the earnings were in line with or above the forecasts but the guidance or the composition of the earnings were not as robust as expected. Investors began to search for companies whose business fundamentals were relatively sheltered in the uncertain top-down environment. Earnings estimates began to get trimmed, with an index-level reduction of about 4%. This resulted in wide performance dispersion in quarter 1 2024 where India and Korea performed well, while Brazil and China posted negative returns. Cyclical stocks generally outperformed the benchmark, but non-cyclical value and growth names lagged. Of the 11 sectors only three exceeded the index in quarter 1, making it the most factor-dominated market environment in a long time.

In quarter 2 some of the same fundamental trends were seen in the previous quarter and investor response to them continued and even became more pronounced. Although the (global emerging market) GEM index produced a positive return of 4.99%, volatility was high, and the returns divergence exceeded that of quarter 1. Brazil, Mexico and Indonesia all trailed the broader index by over 15%, while China, India and Taiwan outperformed. The market's breadth widened somewhat, and four out of eleven sectors exceeded the benchmark. The pace of forecast reductions slowed to about 2%. However, only the cyclical stocks outperformed. The quarter was dominated by investors' positive views of the earnings prospects for the semiconductor companies, helped by the AI demand.

In quarter 3, concerns arose that AI's business potential had been overestimated and saw profit-taking in the tech names. MSCI EM (emerging market) information technology segment lagged MSCI GEM by over 11% in quarter 3, while the latter produced a positive return of 8.86%. The market's breadth improved as seven out of eleven sectors exceeded the benchmark. Regionally, however, the high divergence of returns persisted. The biggest laggard was Mexico whose equity prices were pressured by investor concerns about the upcoming elections. Most of the best performing markets were in Asia, and some in emerging Europe. Earnings estimates were no longer being reduced, with some forecast upgrades. High stable growth and value cyclical segments delivered the strongest returns while traditional cyclicals were the laggards.

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL EMERGING MARKETS FOCUS EQUITY FUND (continued)

#### Portfolio Overview (continued)

In quarter 4, the MSCI GEM index fell (7.6%). Investor concerns about the global economy, geopolitical worries due to two wars and the potential impact of the new US administration all pressured stock prices. Additionally, slowing Chinese and Indian economies and lack of fiscal discipline in Brazil and Mexico combined to create an unpredictable environment. Some companies announced delays in capex plans due to global trade uncertainty. The outcome was that the market returned to the factor-driven return dynamics seen in the first half of 2024. Only three out of eleven sectors exceeded the benchmark. Geographically, Brazil, India, Indonesia, South Korea, the Philippines and Thailand all posted double-digit declines. China was the only sizable market to deliver a positive return more than 10%. After quarter 4, both Brazil and Mexico entered a bear market with full-year declines of more than 26%. GEM earnings estimates fell by about 6%. Somewhat counterintuitively, the biggest share price declines were seen in defensive value stocks.

For the full year 2024, MSCI GEM returned 7.97% with four sectors out eleven exceeding the benchmark. There was wide variation in country performance where Egypt, Brazil, Mexico and South Korea all fell more than 23%. The best performing markets were Taiwan, Malaysia, Peru and the United Arab Emirates (UAE). Traditional cyclical and stable growth segments performed the best, while high growth and defensive value stocks lagged.

2024 saw broader adoption of Environmental Social Governance (ESG) principles by a larger number of corporates. In addition to dividends and independent board directors, more companies are gradually engaging in environmentally and socially conscious behavior and are becoming more consistent in communicating their ESG attributes to the shareholders. Net Zero is an oft-cited environmental goal. Investors, in turn, are adding greater weight to ESG considerations in their decision-making.

The sub-fund lagged (gross and net of fees) its benchmark, the MSCI Emerging Markets Index, during the annual reporting period ending 31st December 2024 due to the outperformance in allocation and underperformance in selection. The strongest contributions to the relative performance were in the consumer discretionary and materials sectors, while the largest detractors were financials and information technology. On a stock level, key detractors were cyclical stocks in Asia, Europe and Latin America and tech names in Asia. Key portfolio contributors to relative returns were stable growth stocks in China, cyclical/tech companies in Asia and cyclical/financial stocks in Asia and Europe.

#### Portfolio Outlook

Looking ahead to 2025, the outlook for Global Emerging Markets is mixed. Many of the top-down concerns seen in 2024 remain in place, such as the war in Ukraine, US trade frictions with China and that these frictions may absorb additional countries. Lack of fiscal discipline in Latin America is also a risk. The uncertainty related to global trade relations is probably the biggest of the risks and is presently difficult to quantify but may have big implications for the company-specific outlook. On the other hand, equities in many of the more vulnerable markets trade at very low valuations, in some cases at a level not seen in years. Any sign of improvement either in the country's environment or in individual company forecasts may lead to high potential upside. Geographically, Brazil, Mexico, Indonesia and China offer the highest returns potential, but also carry the highest risks, each for their own reasons. Globally, we see the best opportunities in cyclicals, especially financials and industrials, as well as in growth companies, such as the internet platforms.

The portfolio is invested in 43 companies with strong management, governance and business models mainly in consumer, financials, technology, industrials and pharma sectors. The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes and have strong ESG characteristics. Sectorally our largest current overweight's are in the financials and information technology, while we are most underweight materials and consumer staples.

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL FOCUS EQUITY FUND

#### Portfolio Objective

PineBridge Global Focus Equity Fund seeks to achieve growth at a reasonable price (meaning securities that have a growth potential and are reasonably priced as determined by conventional measures, such as priced earnings or by comparison to other securities in the same market and the same industry) by making equity and equity-related investments in global markets with a focus on superior and sustainable earnings performance.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Global Focus Equity Fund Class "A", "L", "M", "SR", "Y", "Z5H" and "ZD" returned 19.10%, 19.76%, 18.27%, 20.66%, 20.06%, 18.81% and 21.26% respectively. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) and (SGD) returned 17.49% and 19.68%. For the period 8th April 2024 to 31st December 2024, the PineBridge Global Focus Equity Fund Class "A5HDC" and "ADC" returned 8.03% and 9.69% respectively. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) and (SGD) returned 9.34% and 9.45% respectively. For the period 2nd August 2024 to 31st December 2024, the PineBridge Global Focus Equity Fund Class "R2", "R2D", "SR2" and "SR2D" returned 9.78%, 9.78%, 9.84% and 9.84% respectively. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (GBP) returned 9.86%. For the period 12th November 2024 to 31st December 2024, the PineBridge Global Focus Equity Fund Class "A1" returned (0.31%). Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (EUR) returned 0.77%. For the period 2nd December 2024 to 31st December 2024, the PineBridge Global Focus Equity Fund Class "R" and "R1H" returned (3.01%) and (3.19%) respectively. Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (USD) and (EUR) returned (2.62%) and (2.21%) respectively. For the period 16th December 2024 to 31st December 2024, the PineBridge Global Focus Equity Fund Class "Y1H" returned (3.07%). Over the same period, the benchmark index, the MSCI All Country World Index Daily Total Return Net Index (EUR) returned (2.69%).

#### Portfolio Overview

Consumer and business confidence surveys continue to improve post-election, though the overall pick-up remains more measured versus 2016. Deregulation and the prospect of tax cuts provide tailwinds, but the high level of prices and government deficits are tempering the outlook.

Industrials and financials are emerging as key beneficiaries of rising sentiment, supported by increasing signs that the inventory destocking cycle may be nearing an end. In technology, the magnificent seven (Mag7) are largely being carried by Tesla and Apple, while a notable rotation is taking shape, favoring software and previously lagging sectors over artificial intelligence related semis/hardware. This shift reflects both broader market breadth dynamics as well as fundamental issues around limited liability (LLM) scaling, Intel, Samsung, China capex outlooks.

Healthcare continues to face a political overhang related to Robert F. Kennedy Jr (RFK) but looks overstated at this point. Meanwhile, early holiday spending data looks encouraging as consumers appear poised to spend more this season than in prior years. Some of this strength may be due to a compressed shopping calendar and a "pull-forward" effect driven by tariff considerations.

During financial year 2024, the PineBridge Global Focus Equity Fund outperformed its benchmark, the MSCI All Country World Net Index. Outperformance was driven by strong security selection as well as favorable allocation effect.

Overall, consumer staples and materials were the top contributing sectors to excess returns. By contrast, industrial and information technology were the main laggards.

The sub-fund remains overweight industrials, information technology, communication services, and health care and underweight energy, materials, financials, utilities, real estate, consumer discretionary, and consumer staples.

# PineBridge Global Funds

## Investment Manager's Report (continued)

### PINEBRIDGE GLOBAL FOCUS EQUITY FUND (continued)

#### Portfolio Overview (continued)

The sub-fund seeks to outperform its benchmark through bottom-up stock selection, rather than from top-down allocation, and has benefited by owning select companies globally that are improving their market positions and exercising stronger-than-peer pricing power through new technologies and operating processes.

#### Portfolio Outlook

The team continues to believe that risk-reward is attractive for fundamental investors over the medium-term. Short-term market disruptions (rising interest rates, weakness in China economic activity) are masking several underlying secular trends. These include the massive investments needed to achieve the Paris agreement's net-zero carbon emissions targets, the diversification of global supply chains, and increasing digitalization across all industries.

The disconnect between these short-term and long-term forces may create attractive buying opportunities in companies set to benefit from longer-term secular trends but whose valuations have dropped amid the generalised equity declines.

The Fund continues to be constructed style-neutral through stock selection, with the principal themes expressed in the portfolio that include corporate transformation, global capex investment, technology enablers, and global affluence.

**PineBridge Investments LLC**  
**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE GREATER CHINA EQUITY FUND

#### Portfolio Objective

PineBridge Greater China Equity Fund seeks to provide long-term capital growth by investing in equity and equity related securities of companies whose assets, products or operations are in the Greater China Region.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Greater China Equity Fund Class "A" returned 20.45%. Over the same period, the benchmark index, the MSCI Golden Dragon 10/40 Net Return (USD) returned 19.04%.

#### Portfolio Overview

In 2024, Hong Kong equity market became one of the most outperforming markets globally, after the significant rally in late September and early October. China equity market also recorded positive returns. As the economy continued to be softening in the first half of 2024, the central government of China announced several rounds of high profiled stimulus measures to boost the equity market & domestic consumption, and to stabilise the property market since late September. The equity market responded with a very sharp rally immediately, but started to fade gradually as the actual details of the policies disappointed the heightened market expectations. Following Trump's win and a red sweep in the US elections in November, market sentiment was further hit with concerns about further tariff risk and geopolitical risk, before it stabilised towards the end of the year.

In Taiwan, equities continued the strong rally from 2023, driven by the strong shipment in high end semiconductors and generative AI related stocks. The overall Greater China equity market as a whole recorded decent positive return in the year.

The sub-fund outperformed its benchmark, the MSCI Golden Dragon 10/40 Net Return (USD) Index, during the year. The fund's stock selections in financial and consumer discretionary sectors contributed to the performance, while stock selections in the utilities and real estate sector detracted.

In the financials, several Chinese state-owned enterprise (SOE) banks outperformed due to investors' preference in high dividend stocks, and they started to show improving trend of net interest margin erosion. Our stock pick of auto and home appliance companies outperformed the overall consumer sector which was experiencing weak consumption trend in the year. On the flip side, in utilities sector, the share prices of some of our holdings were negatively impacted by the indirect exposure to China properties.

#### Portfolio Outlook

After several rounds of stimulus measures announced in fourth quarter 2024, the Chinese economy showed small improvements in some areas, such as property sales and the declining trend of money supply M1 towards the end of the year. Nevertheless, overall, the economic recovery is still relatively soft. Sentiment is also weak amid potential new rounds of tariff hikes from the US on Chinese exports in the new year. We hold our previous view that while the recent policies are supportive, substantial fiscal policies and higher-level reforms, in particular, are needed to solve the deep-rooted structural problems in China, to bring back business and consumer confidence.

In Taiwan, we continue to be positive on the long-term outlook of the technology sector. Although there could be some near-term volatility due to technical problems to be resolved on the supply side, we are positive on the structural trend of AI and the ramp up of mass production of Nvidia's new GPU products in the new year.

With the huge volatility in the market, we continue to look for investment opportunities with a bottom-up approach and focus on companies with structural growth drivers and better earnings visibility.

## Investment Manager's Report (continued)

### PINEBRIDGE INDIA EQUITY FUND

#### Portfolio Objective

PineBridge India Equity Fund seeks to provide long-term capital appreciation by investing in equity and equity-related securities of companies listed on stock exchanges in India or closely related to the economic development and growth of India.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge India Equity Fund Class "A", "A5", "A5CP", "R", "R1", "R2D", "RD", "Y", "Y3", "YD" and "Z" returned 8.30%, 11.89%, 12.22%, 9.45%, 16.46%, 11.23%, 9.45%, 9.17%, 20.94%, 9.17%, and 10.27% respectively. Over the same period, the benchmark index, the MSCI India Daily Total Return Net (USD), (SGD), (EUR), (GBP) and (JPY) returned 11.22%, 15.02%, 18.64%, 13.20% and 23.20% respectively.

#### Portfolio Overview

While the Indian markets maintained their northern trajectory for most of the year backed by inflows into domestic mutual funds and foreign fund buying, a slowdown in the economic growth, expectations of lackluster quarterly earnings, foreign investor selling, and high valuations of small cap names weakened the markets towards the end of the year. The change in leadership of the central bank should have a positive impact on accelerating credit growth, which has weakened in the past six months.

Our underweight position in energy and overweight position in industrials contributed to the performance while our underweight position in consumer discretionary detracted the performance.

#### Portfolio Outlook

We are passionate believers in India's economic future, and we believe India has leapfrogged technologically compared to the world and is now a fertile platform for business innovation while simultaneously become a nation that is confident of its ability to supply the world with its goods and services by leveraging its vast human resources.

The impact of the US trying to reshore manufacturing should provide an opportunity for Indian companies to establish a presence there and unlock a new area of growth. Bank credit growth in India, which had decelerated in recent months, has now turned around and is showing signs of acceleration. Foreign investor withdrawals have stabilised, while domestic investors have continued investing. Global energy prices are relatively stable, providing margin stability to companies. The recent volatility in the markets, along with a very strong pipeline of initial public offers (IPOs), should provide ample opportunities to deploy capital.

**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE JAPAN EQUITY FUND

#### Portfolio Objective

PineBridge Japan Equity Fund seeks to achieve long term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

#### Portfolio Performance

For the year 1st January to 31st December 2024 the PineBridge Japan Equity Fund Class "A", "Y" and "Z" returned 14.29%, 15.21% and 16.36% respectively. Over the same period, the benchmark index, the TOPIX Total Return Net Index (USD) returned 7.64%.

#### Portfolio Overview

The Japanese equity market, the broad market index of Topix Total Return, gained by 20.45% in the local currency.

From January, the market was pushed up by buying by foreign investors backed by expectations for an end to deflation in Japan, and the BoJ ended its negative interest rate policy in March. In July, with the yen depreciating to more than 160 per US dollar, Topix hit a record high. In August, the yen gained significant ground against the US dollar as the outlook for the US Fed to cut interest rates contrasted with the BoJ hawkish stance. The Japanese equity market dipped in August due to the negative surprise by the BoJ hawkish stance. After that, the yen weakened, US stocks rallied, and news of a merger and acquisition (M&A) in Japan's auto industry came to the forefront. These factors helped the Japanese equity market to resume towards the end of the year.

Through 2024, long term rates rose both in Japan and US, and the yen depreciated against US dollar.

The top performing sector was financials reflecting the rising interest rates, and bottom performing sector was defensives, especially railway transportation, which has relatively high debt amid the rising interest rates.

As for corporate fundamentals, earning revisions were neutral during the first half, and turned positive during the third quarter. However, they dropped in the fourth quarter and ended with neutral at the year-end. As for the supply/demand situation of equities, the Japanese corporates were the major buyers, and others, such as overseas investors, individual investors and financial institutions, were the major sellers.

The sub-fund outperformed (gross and net of fees) its benchmark, the TOPIX Total Return Net Index. Sector allocation was negative as the negative impact of cash holdings and an underweight to domestic cyclicals was larger than the positive impact of an underweight to consumption and commodities. Stock selection was beneficial to the sub-fund performance since positive contribution from the stocks in global cyclicals and domestic cyclicals was larger than the negative contribution from the stocks in defensives.

#### Portfolio Outlook

We are facing some concerns, such as the Russia-Ukraine situation, the Middle East situation, the central banks' stance on interest rates, and the outlook of the macroeconomy, etc. We also need to keep a careful eye on the potential frictions in the regions, such as US-China relations, North Korea, etc.

The Japan equity market may be volatile due to the above-mentioned concerns in the short term. The Ishiba administration begins in October 2024, and we need to closely monitor the policies together with the Bank of Japan's policies. In the medium term, however, the team believes that the Tokyo-Stock-Exchange-led reforms, which require listed companies traded under a price-to-book ratio of 1.0x to submit plans to raise their valuation from fiscal year 2023 (FY23), will support corporate earnings and the equity market. The Japanese stock market, whose estimated Price to earnings ratio (P/E) for fiscal year 2025 is around 15x, is still in the middle range over the past 10 years.

# PineBridge Global Funds

## Investment Manager's Report (continued)

### PINEBRIDGE JAPAN EQUITY FUND (continued)

#### Portfolio Outlook (continued)

The team has maintained the sub-fund's slight overweight position in global cyclicals to take advantage of the market and cyclical recovery while carefully balancing the portfolio weights so as not to take too much risk on sector allocation.

PineBridge Investments Japan Co., Ltd.  
January 2025

## Investment Manager's Report (continued)

### PINEBRIDGE JAPAN SMALL CAP EQUITY FUND

#### Portfolio Objective

PineBridge Japan Small Cap Equity Fund seeks to achieve long-term capital growth by making at least two-thirds of its total investments in equity and equity-related investments in small Japanese companies, i.e. companies incorporated in Japan or companies whose assets, products or operations are in Japan.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Japan Small Cap Equity Fund Class "R2D", "A", "A12", "A3", "M", "R1D", "RD", "Y" and "Y3" returned (5.49%), (7.47%), 1.79%, 3.20%, (7.56%), (0.71%), (6.74%), (6.83%) and 4.03% respectively. Over the same period, the benchmark index, the MSCI Japan Small Cap Daily Total Return Net Index (USD), (EUR), (SEK), (JPY) and (GBP) returned 4.21%, 11.04%, 13.88%, 16.35% and 6.32% respectively.

#### Portfolio Overview

In 2024, the sub-fund underperformed its benchmark, the MSCI Japan Small Cap Daily Total Return Net Index, on both a gross and net of fees basis. This underperformance was primarily driven by the portfolio's overweight positions in domestic growth companies and micro-cap stocks. These growth companies, although less impacted than in 2023, continued to face headwinds due to their high correlation with bond yields, which remained high amid persistent inflationary pressures. This resulted in negative attributes to the portfolio. Additionally, micro-cap growth stocks remained under selling pressure, even as some relatively liquid growth companies and high return-on-equity companies rebounded.

Sector selection was largely neutral. The Bank of Japan's rate hike stance led to regional banks being the best performers, which the portfolio did not hold, contributing to the underperformance. This was offset by an underweight position in Real Estate Investment Trust (REITs), which underperformed for the same reason. The outperformance of global cyclicals, amid the depreciation of the Japanese yen, had a neutral impact.

At the individual stock level, nine of the ten worst detractors were domestic growth companies, with one being a biotechnology company. Conversely, among the top ten contributors, five were global cyclicals, four were domestic growth companies, and one was a biotechnology company.

#### Portfolio Outlook

After five years marked by the pandemic, easy monetary policy, fiscal spending, supply chain constraints, high inflation, and subsequent tight monetary policy, macroeconomic statistics are finally stabilising. However, some volatility is expected due to new policy implementations by the Trump administration. This normalisation is anticipated to revive market risk appetite for small-cap companies, particularly small-cap growth stocks, which have been out of favor for over three years.

From a valuation perspective, smaller-sized stocks have become more attractive over the past year. The forward-looking price to earnings ratio for micro-cap stocks for fiscal year 2025 (FY25) is now 12.6x, while top-cap stocks are 16.6x, reflecting the size performance divergence observed in the Russell/Nomura Index series.

Simultaneously, renewed geopolitical tensions under the new US regime present both risks and opportunities for the Japanese economy and its corporations. Generative AI is transitioning from research and development (R&D) to implementation, creating industry-wide risks and opportunities. In this dynamic environment, we will maintain an overweight position in undervalued growth companies poised to capitalise on these changes.

**PineBridge Investments Japan Co., Ltd.**  
**January 2025**

## Investment Manager's Report (continued)

### PINEBRIDGE LATIN AMERICA EQUITY FUND

#### Portfolio Objective

PineBridge Latin America Equity Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies operating in the economies of Latin America.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Latin America Equity Fund Class "A" and "Y" returned (30.13%) and (29.57%) respectively. Over the same period, the benchmark index, the MSCI Emerging Markets (EM) Latin America Daily Total Return (DTR) Net Index (USD) returned (26.84%).

#### Portfolio Overview

In 2024, the MSCI EM Latin America DTR Net Index declined 26.84%, underperforming the MSCI Emerging Market Index, which rose 7.97%. It was a year of significant challenges for the region and of depreciation of every currency except the Peruvian Sol affecting USD returns.

Peru and Colombia were the only two markets in the region to post positive returns for the year largely driven by two idiosyncratic constituents in the financial sector. Elevated energy and commodity prices also benefited both countries in 2024. Chilean stocks' relative outperformance (versus the region) was driven by two retailers that turned around performance after making strategic changes as well as an airline that recently restructured and a logistics company. The Chilean economy grew faster than expected in 2024 while falling inflation allowed for the central bank to begin a rate cutting cycle. Brazil was one of the lowest-performing markets globally due to rising fiscal deficits, rising inflation, a counter-cyclical interest rate hiking cycle (compared to a global easing cycle), and investors' lack of confidence in the current political regime to curtail spending. As a result, the BRL depreciated 21.3% versus the USD in 2024. Productivity growth of 2.3% in 2023 has slowed to below 1% through quarter 3. Part of this slowdown is due to a decline in agricultural productivity, which fell from over 20% to 5% this year. The industrial and utilities sectors also experienced a decline in productivity for the year. This was reflected in company earnings as highly levered industrial companies that require significant capital to grow were among the key laggards for the year. Brazilian corporate earnings forecasts saw average reductions of 9% in BRL but 29% in USD terms. Economic activity remains robust with historically low unemployment, and outstanding loans are expected to grow 5% in real terms for 2024 despite the tightening financial conditions. Mexico's underperformance was driven by unfavorable constitutional reforms and potential trade risks along with a rapidly depreciating currency during the year. Recent conference calls with corporates' management generally described an environment where consumption is slowing compared to the first half of the year.

All sectors in Latin America (LatAm) posted negative returns with health care, real estate, and information technology performing the worst while energy, industrials, and consumer discretionary performed the best on a relative basis. The relative outperformance in industrials came from low leverage, globally integrated exporters, Mexican airports, and a few companies that underwent a successful restructuring.

LatAm markets fell 15.68% in the first half of 2024 driven by declines in real estate, health care, and information technology, while energy, communication services, and materials outperformed on a relative basis. LatAm markets fell another 12.69% in the second half of 2024 driven by the same sectors as the first half while industrials, consumer discretionary, and energy outperformed on a relative basis.

The sub-fund lagged its benchmark, the MSCI Emerging Markets Latin America Daily Total Return Net Index, during the year 2024 gross and net of fees. Positive contributors to the sub-fund's relative performance were stock selection in Peru and Mexico as well as an idiosyncratic position in Argentina. They were offset by stock selection in Brazil and Chile as well as allocation in Chile. At a sector level, the largest contributors to relative returns were stock selection in financials, health care, and allocation in consumer discretionary while the main headwinds came from selection in consumer staples, communication services, and consumer discretionary.

## Investment Manager's Report (continued)

### PINEBRIDGE LATIN AMERICA EQUITY FUND (continued)

#### Portfolio Outlook

Looking ahead, key factors for future performance in Mexico include visibility on U.S. tariff policies, global investment trends (positive nearshoring developments), and earnings growth. Additionally, anticipated dovish monetary policy with potential rate cuts by Banxico, and fiscal discipline aimed at reducing the deficit should factor in as well. Recent constitutional reforms and potential trade risks related to the U.S., Mexico, Canada Agreement (USMCA) renegotiation will be monitored by investors. Despite institutional challenges, Mexico's market valuations are favorable, with low local equity allocations and resilient earnings projected to grow by 12% in USD terms for 2025. Chilean markets face upside risks from potential political changes in the 2025 presidential elections, a low-interest rate environment, lower inflation, and a reduced fiscal deficit. Attractive valuations, improving earnings trends, higher anticipated copper prices, and potential capital inflows due to falling interest rates and pension reforms make Chilean equities appealing. Brazil continues to suffer from both fiscal and global developments (stronger dollar, higher Treasuries), leading the BRL to continue to depreciate, inflation expectations to climb and a tightening cycle. A weaker dollar, lower bond yields and stronger China would boost Brazil, but given the current challenges, we would prefer the global exporters that are less domestically insulated as well as blue chip stocks. Potential confrontations between the executive and congress loom ahead of next year's elections, alongside initiatives like new pension withdrawals in Peru, which will increase political uncertainty and valuations do not look as discounted as other countries in the region, however continued strength from copper prices should benefit the local economy as well as equity prices. High inflation coupled with higher rates are the key challenges for Colombia along with a significant drop in tax revenues and persistent fiscal deficits. Valuations look among the most discounted in the region and some stocks could be a deep value play if a catalyst were to materialize.

The team continues to identify companies that are best positioned to succeed in the current economic environment and are mispriced relative to their investment characteristics. We seek to construct style-neutral, high-conviction differentiated portfolios of companies whose business success is driven by unique competitive attributes, who have strong ESG characteristics.

## Investment Manager's Report (continued)

### PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND

#### Portfolio Objective

The investment objective of the sub-fund is to attain long term growth of capital by means of a diversified portfolio through investment in equity and equity-related securities of companies, at least 90% of which have assets, products or operations based in the United States or are included in the Russell 1000 index. Up to 10% of the value of the sub-fund may be invested in other companies which have a US Stock Exchange listing. The Russell 1000 Index is constructed by the Russell Investment Group to provide a comprehensive and unbiased barometer for the large-cap segment of the US equity universe and is completely reconstituted annually to ensure new and growing equities are reflected.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge US Large Cap Research Enhanced Fund Class "A", "A5CP", "A5H" and "Y" returned 26.62%, 30.95%, 24.19% and 27.25% respectively. Over the same period, the benchmark index, the Standard & Poor's 500 Total Return Net Index (USD) and (SGD) returned 24.50% and 28.76% respectively.

#### Portfolio Overview

The stock market had another positive month in January as it responded positively to favorable economic data. The S&P 500 gained nearly 2% and is now up almost 21% over the past 12 months. The U.S. economy grew 3.1% over the past year, thanks to a resilient labor market that supported strong consumer spending. Stocks advance in February with indexes like the S&P 500 hitting new highs, labor market remains strong, and the non-manufacturing sector improved from January to March. The S&P 500 continued its onward-and-upward trade in March (up 3.10%), breaking through the 5,100 and 5,200 levels. The magnificent seven accounted for 37% of the monthly return, but a new gang of four has emerged, like Nvidia, Microsoft, Meta Platforms (META) and Amazon.com, with their gains accounting for 47% of the year to date (YTD) return.

Equity market performance was weak in April, with the S&P down 4.1% after a significant rally in quarter 1. The Federal Reserve reaffirmed that their policy stance is restrictive and will likely delay the start of monetary easing until later in the year. This led to the 10-year yield climbing 48 bps in April. All three clusters outperformed in April. Valuation picked up halfway through the month, with sentiment remaining relatively stable. Quality peaked halfway through the month and then stabilised. Cap-weighted model deciles outperformed whereas equal-weighted model deciles were muted. Lowest quality cluster decile outperformed, as well as lower valuation model decile. Equity market performance was positive in May, with the S&P 500 up 4.91% during the month. The reported personal consumption expenditures (PCE) was modest in May, a positive signal amidst restrictive monetary policy. Generic momentum and quality factors outperformed in May. The sentiment cluster was relatively flat throughout the month, until the last week when there was a reversal between sentiment and valuation. Valuation picked up towards the end of the month after declining throughout the month. Quality showed a similar pattern of decline until the end of the month. On a cap-weighted basis, the top model deciles outperformed; however, on an equal-weighted basis, bottom model deciles outperformed. In June, both the quality and sentiment clusters were strong, both finishing positively.

The sentiment cluster showed the strongest performance in the month. Valuation struggled throughout June but showed signs of improvement towards the end of the month. Overall, the model was positive throughout the month. The top model deciles outperformed while the bottom model deciles underperformed in June on both a cap-weighted and equal-weighted basis. Equity market performance was positive in July, with the S&P 500 up 1.19% during the month. Generic valuation, momentum and quality factors outperformed in July. Generic momentum factors remained concentrated into mega-caps. Towards the end of the month, rotation from generic quality into valuation factors began. Our valuation cluster showed the strongest performance after improving considerably in the second half of the month. Quality and sentiment clusters both struggled while quality started to show some resilience at the end of the month. Overall, the model was slightly positive by the end of the month. Valuation's top quintiles outperformed on both a cap-weighted and equal-weighted basis.

## Investment Manager's Report (continued)

### PINEBRIDGE US LARGE CAP RESEARCH ENHANCED FUND (continued)

#### Portfolio Overview (continued)

Equity market performance was positive overall in August, with the S&P 500 up 2.38% during the month. The market showed signs of recovery after a sell-off due to the reversal of carry trades in the first week of August. Generic momentum and quality factors outperformed in August, as well as reversal factors as investors rotate away from growth and technology names due Federal Reserve projected rate cuts. The sentiment cluster outperformed during the month with consistent positive performance after the first week of August. The quality cluster was relatively flat, whereas valuation underperformed. Valuation was flat by the end of the month. Sentiment's top deciles outperformed, and bottom deciles underperformed, on both a cap and equal-weighted basis. This was true for the quality cluster as well. Overall, the model performance was positive throughout the month. Equity market performance was positive overall in September, with the S&P 500 up 2.14% during the month. Generic quality factors outperformed in September, triggered by robust expected growth and expected Federal Reserve cuts.

Generic momentum and reversal factors also outperformed in September as growth stocks benefitted from the Federal Reserve's first rate cut. Generic valuation factors, such as book-to-market, underperformed during the month due to Fed's rate cut. On a year-to-date basis, generic momentum has outperformed. All three clusters underperformed during the month, with quality improving halfway through the month. The valuation cluster underperformed halfway through the month. Quality's top decile outperformed on a cap-weighted basis. Equity market performance was negative overall in October, with the S&P 500 down 0.93% during the month. Generic momentum, volatility and growth factors outperformed in October as volatility from the U.S. election in November looms. On a year-to-date basis, generic momentum has outperformed. Our sentiment cluster consistently outperformed throughout the month, with top model deciles outperforming and bottom model deciles underperforming, on a cap and equal weighted basis. Valuation struggled throughout the month.

Quality was positive in the first half of the month but declined in the second half of the month. Overall, the model was positive throughout the month. Equity market performance was positive in November as the S&P 500 outperformed in a post-presidential election rally. Generic growth, momentum and volatility factors were up last month, with oil price sensitivity factors up as well. Our sentiment's top model deciles outperformed while the bottom model deciles underperformed on both a cap and equal-weighted basis. Sentiment's performance was positive in the last half of the month, while quality struggled throughout the month. Valuation's performance was relatively inconsistent, but was overall flat throughout the month. Overall, the model was positive throughout the month. The equity market experienced a decline in December, with the S&P 500 down 2.42%. The market reacted negatively on Fed's indication on fewer rate cuts in 2025. However, overall, 2024 was a strong year for equity market, with S&P up 25.02%. Generic growth factors outperformed in December, while momentum underperformed during the month due to Fed's revision on the outlook and the market reversal. Sentiment cluster outperformed through the month, with quality remained mostly flat and valuation underperformed. Sentiment's top quintile outperformed on both a cap and equal-weight basis.

#### Portfolio Outlook

The equity market entered 2025 with a strong positioning, despite political uncertainties. Slower and fewer interest rate cuts in 2025 have been largely priced in by the current market. Research enhanced clusters outperform more in a soft-landing scenario. The sentiment cluster has historically exhibited clear outperformance in soft-landing scenarios following monetary tightening cycles. We expect our clusters to outperform.

All three clusters underperformed during the month, with quality improving halfway through the month. The valuation cluster underperformed halfway through the month. Quality's top decile outperformed on a cap-weighted basis. Equity market performance was negative overall in October, with the S&P 500 down 0.93% during the month. Generic momentum, volatility and growth factors outperformed in October as volatility from the U.S. election in November looms. On a year-to-date basis, generic momentum has outperformed. Our sentiment cluster consistently outperformed throughout the month, with top model deciles outperforming and bottom model deciles underperforming, on a cap and equal weighted basis. Valuation struggled throughout the month. Quality was positive in the first half of the month but declined in the second half of the month. Overall, the model was positive throughout the month. Equity market performance was positive in November as the S&P 500 outperformed in a post-presidential election rally.

Generic growth, momentum and volatility factors were up last month, with oil price sensitivity factors up as well. Our sentiment's top model deciles outperformed while the bottom model deciles underperformed on both a cap and equal-weighted basis. Sentiment's performance was positive in the last half of the month, while quality struggled throughout the month. Valuation's performance was relatively inconsistent, but was overall flat throughout the month. Overall, the model was positive throughout the month. The equity market experienced a decline in December, with S&P 500 down 2.42%. The market reacted negatively on Fed's indication on fewer rate cuts in 2025. However, overall, 2024 was a strong year for equity market, with S&P up 25.02%. Generic growth factors outperformed in December, while momentum underperformed during the month due to Fed's revision on the outlook and the market reversal. Sentiment cluster outperformed through the month, with quality remained mostly flat and valuation underperformed. Sentiment's top quintile outperformed on both a cap and equal-weight basis.

#### Portfolio Outlook

The equity market entered 2025 with a strong positioning, despite political uncertainties. Slower and fewer interest rate cuts in 2025 have been largely priced in by the current market. Research enhanced clusters outperform more in a soft-landing scenario. The sentiment cluster has historically exhibited clear outperformance in soft-landing scenarios following monetary tightening cycles. We expect our clusters to outperform.

## Investment Manager's Report (continued)

### PINEBRIDGE USD HIGH YIELD BOND FUND

#### Portfolio Objective

The investment objective of PineBridge USD High Yield Bond Fund is to aim to maximize total return consisting of current income and capital appreciation by primarily investing in USD-denominated high yield debt securities.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge USD High Yield Bond Fund Class "A5HD", "X", "X1", "X2", "X2D", "X2H", "X2HD" and "X7" returned 4.16%, 7.05%, 14.20%, 8.97%, 8.97%, 6.72%, 6.69% and 15.27%, respectively. Over the same period, the benchmark index, the Bloomberg U.S. High Yield 2% Issuer Capped Index (USD), (EUR), (GBP Hedged), (GBP Unhedged), (SGD) and (CHF) returned 8.19%, 15.42%, 7.85%, 10.12%, 11.89% and 16.50%, respectively.

#### Portfolio Overview

The first quarter of 2024 was mixed for fixed income assets. Higher-yielding and less duration-sensitive asset classes, such as high yield bonds, generated positive total returns as the benefit of spread compression more than offset the impact of higher Treasury rates. Market expectations for the number of Fed rate cuts came down from six at the beginning of the year to just one or two by the end of the quarter. US inflation surprised higher for the third consecutive month in March. While the Fed indicated that it believed cuts will be appropriate at some point this year, sticky inflation, alongside strong growth and a resilient consumer, resulted in a more hawkish narrative. High yield bonds generated another quarter of strong total returns in the second quarter. US Treasury rates continued to trade higher with the long end of the curve steepening. A stronger-than-expected retail sales report, a higher-than-expected Consumer Price Index (CPI) report and positive labor market data all combined to move US Treasury rates higher in April, driving negative total returns for the month. However, towards the latter half of the quarter, Treasuries rallied on the back of a very favorable May CPI report, weaker economic data, political unrest in France, and Fed projections suggesting a delayed but not necessarily less substantial easing cycle. The move lower in Treasury rates helped drive positive total returns in May and June despite slightly wider spreads. Given this backdrop, higher quality, and longer duration segments of the high yield market outperformed. Corporate credit fundamentals remained strong relative to longer-term averages but came down off the peaks seen in prior years. At the midpoint of 2024, fixed income investors remained in an environment of elevated policy rates, with expectations having shifted toward modest Fed cuts later in the year and a global easing pathway commencing at a slower pace.

Most fixed income asset classes saw strong total returns to start the second half of the year. US Treasury rates rallied on the back of cooling inflation. The consumer price index rose 2.4% for the 12 months ending September, down from 2.9% ending in July. Other than a brief period of volatility in early August, the credit spread traded tighter for most of the quarter. Among high yield issues, second quarter earnings were largely positive, led by the housing, transportation and gaming/leisure sectors. On the negative side, energy, cable, and telecom were laggard during the quarter and there was a notable increase in negative guidance revisions. Performance was mixed for fixed income asset classes in the fourth quarter. Amid strong demand for credit and other risk asset classes, high yield spreads traded in a narrow range, tightening during the quarter. High yield bonds generated a positive total return for the ninth consecutive quarter, albeit the lowest quarterly return during that period, as strong returns in November outpaced negative total returns in October and December. Risk asset classes had already rallied sharply going into the November presidential election with economic data supporting a narrative of receding labor market concerns and robust consumer spending. Donald Trump's U.S. presidential election victory caused a further rally in spreads as investors bet on lower corporate taxes, deregulation, and a more active mergers and acquisition (M&A) environment. In widely anticipated moves, the Federal Reserve cut rates 25 bps at both their November and December meetings, bringing the Federal Funds rate to a target range of 4.25%-4.5%. However, the December cut came alongside a hawkish tone, with the "dot plot" showing just two cuts in 2025, compared to 100 bps when Fed officials last released these forecasts in September and market expectations of 75 bps before the announcement, as inflation has held firm above the Fed's target level and growth remained solid. Specifically Core CPI increased 0.3% in November, rising by the same stubbornly high margin for the fourth consecutive month. Following the announcement, risk assets sold off sharply and Treasury yields rose dramatically.

## Investment Manager's Report (continued)

### PINEBRIDGE USD HIGH YIELD BOND FUND (continued)

#### Portfolio Overview (continued)

According to Bloomberg data, Ba-rated bonds returned 6.30%, while single-B rated bonds returned 7.38% and CAA-rated bonds returned 15.09%. Treasury rates were volatile during the year, trading higher. Overall, for the trailing twelve-month period, 5- and 10-year Treasury yields traded 53 bps and 69 bps higher, respectively. The option-adjusted spread (OAS) on the Bloomberg U.S. High Yield 2% Issuer Capped Index traded 36 bps tighter during the year to end at 323 bps, trading as tight as 253 bps during November, a post-financial crisis record tight and just 22 basis points wide of the all-time tight level of 231 bps reached in 2007. Issuer fundamentals ended the year having modestly deteriorated but remain strong overall. Following quarter 3 earnings season, the leverage was 4.05x and is 0.29x off the low from quarter 1 2023 but is still below the historical average of 4.3x. EBITA increased 3% quarter over quarter, with 2.4x as many issuers beating EBITA expectations as missing. The new issue volume ended the year at \$288.8bn compared to \$176.1bn in 2023. For the year, high yield inflows totaled \$16.4bn, compared to outflows of \$7.0bn in 2023. The par-weighted US high yield default rate including distressed exchanges ended December at 1.47%, down 141 bps since year-end.

The sub-fund underperformed (gross and net of fees) its benchmark, Bloomberg U.S. High Yield 2% Issuer Capped Index, in 2024. Security selection detracted from performance for the year. Communications, consumer non-cyclical, and consumer cyclical holdings were the most notable detractors from performance. Meanwhile, selection among basic industrial, capital goods, and technology credits contributed. From sector selection standpoint, the cash position, an underweight allocation to consumer non-cyclicals and an overweight allocation to the electric utilities sector detracted from performance. Conversely, an underweight allocation to capital goods and overweight allocations to the transportation and technology sectors contributed.

#### Portfolio Outlook

Our base case has been that we are entering a rare non-recessionary rate-cutting cycle that should support credit performance in 2025. The US election's red-sweep outcome is expected to add to pro-growth policies and further support risk assets from a fundamental perspective, while introducing potential headwinds outside the US amid more restrictive trade policies. With a second Trump administration forthcoming, concerns have turned toward how aggressively Trump will advance his campaign promises on immigration and trade. On immigration, it seems highly likely that Trump would quickly end the asylum programs established during the Biden administration. Over time, this could bring job growth back to pre-pandemic levels of about 100,000 jobs per month, which is expected to have a minimal inflationary impact. While large-scale deportations are a possibility, they would happen further down the road. The bigger uncertainty revolves around how swiftly and forcefully Trump will implement trade restrictions, including significantly higher tariffs on China. In the first Trump presidency, higher import prices led to only a modest rise in consumer prices and slightly slower economic growth. A looser regulatory environment may offset these concerns, leaving the overall growth outlook for next year unchanged despite the shifting variables. Jobs data suggest that the base-case economic scenario is still leaning toward a soft landing.

The team continues to believe that defaults will remain stable – trending higher but remaining below 3%. Fundamental strength in credit metrics appears to have peaked, but started at a high level and should remain strong. Solid growth and the potential for inflationary pressures in the United States could result in a less accommodative Fed tone. By contrast, the weaker economic outlook for Europe will allow the ECB to cut rates at a steady pace. The net outcome should be a stronger US dollar. Offsetting positive fundamentals are extremely tight valuations, which fully reflect hyper-bullish sentiment. We, therefore, see a benefit in being “centrist” and balanced in portfolio risk positioning, instead targeting security selection opportunities to take advantage of divergent prospects among issuers.

## Investment Manager's Report (continued)

### PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND

#### Portfolio Objective

The investment objective of PineBridge USD Investment Grade Credit Fund is to aim to maximise total return and provide capital preservation through investment in the US Investment Grade credit universe.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge USD Investment Grade Credit Fund Class "A", "C" and "Y" returned 1.69%, 0.58% and 2.41% respectively. Over the same period, the benchmark index, the Bloomberg US Credit Total Return Index (USD) returned 2.03%. For the period 9th February 2024 to 31st December 2024, the PineBridge USD Investment Grade Credit Fund Class "YYDC" returned 4.03%. Over the same period, the benchmark index, the Bloomberg US Credit Total Return Index (USD) returned 3.51%.

#### Portfolio Overview

Strong US economic data and a dovish pivot from the Fed propelled the credit market rally further into the new year. The markets, clinging on to the dovish sentiment, continued to price up to seven rate cuts in 2024, which led to a continuation of the risk rally that ended 2023. Inflation and the job market continued to surprise to the upside in April. The rebound in inflation served as a trigger to drive yields sharply higher during the month. Accordingly, markets repriced the expectations from the Federal Reserve from more than two rate cuts, to slightly more than one for 2024. The escalating geo-political risks early in the month also kept markets on edge, as they drove oil and commodity prices higher.

June began with stronger-than-expected payroll data which drove treasury yields higher and pushed back rate-cut expectations. However, the economic data that followed as the month progressed was mostly weaker than expected. This dynamic led to a rally in US Treasuries, as 10-year rates moved 11 bps lower for the month. At the June Federal Open Market Committee (FOMC) meeting, the committee voted unanimously to leave the benchmark rate unchanged in the target range of 5.25%-5.5%, a two-decade high, for a seventh straight meeting. The FOMC median dots projected a single quarter-point cut in 2024, two fewer than the previous round of quarterly forecasts in March, resulting in greater concern regarding the pace of the move to lower inflation.

Interest rates rose in October due to stronger U.S. economic data and uncertainties surrounding the upcoming U.S. elections. The Republican sweep in US elections led to a rally in US credit markets. The treasury yields initially spiked 16 bps on the day after the election, but they reversed course and headed lower towards the end of the month following the nomination of the treasury secretary and some signs of a slowdown in the economy. The Federal Reserve lowered the benchmark rate by 25 bps in their FOMC meeting on 7th November, keeping options open for the December meeting and beyond.

Credit markets were under pressure in December driven by the hawkish stance by the Federal Reserve, somewhat softer US economic data and a bear steepening of the treasury yield curve. The Federal Reserve lowered the benchmark rate by 25 bps as expected at their FOMC meeting on 18th December, bringing the total cuts to 100 bps for the year. The big surprise came from the Fed's projections for policy going forward, which penciled in just two cuts. The Fed chair also reiterated at the press conference that the Fed will now cut rates when it sees further progress on inflation. Markets viewed this as hawkish, and the two-year treasury yields closed 12 bps higher on the day.

The sub-fund outperformed its benchmark, the Bloomberg US Credit Total Return Index, during the period due to positive contributions from security selection, primarily in the Financials and Communication sectors. Asset allocation was also positively driven by the underweight government sector but overweight capital goods modestly detracted performance. The portfolio duration was modestly overweight benchmark which also detracted performance during the period.

# PineBridge Global Funds

## Investment Manager's Report (continued)

### PINEBRIDGE USD INVESTMENT GRADE CREDIT FUND (continued)

#### Portfolio Outlook

Credit spreads modestly widened in December after reaching the tightest levels since 1998 in November. Supply and corporate earnings and outlooks are likely to be the key factors that will likely determine the direction of the spread in the near term, as spreads remain relatively range bound.

Over the longer term, we expect spreads to move modestly wider due to a typical increase in supply and focus on the ongoing risks inherent in the economy. While we don't expect significant widening, we expect them to remain in a 70 bps to 95 bps range for much of the new year. This dynamic is based on our view that we remain mid-cycle economically with relatively robust fundamentals. Valuations are likely to remain through long-term averages as all-in yields continue to be relatively attractive. Support should continue domestically due to these higher overall yields, while foreign interest will be bolstered by lower hedging costs that should be realised as the Fed moves short term rates lower.

## Investment Manager's Report (continued)

### PINEBRIDGE ASIA DYNAMIC ASSET ALLOCATION FUND

#### Portfolio Objective

PineBridge Asia Dynamic Asset Allocation Fund seeks long-term capital appreciation by identifying new and changing economic and investment trends and investing primarily in the Asia Pacific Region by taking a forward view of fundamental economic and market conditions across the region.

#### Portfolio Performance

For the year 1st January to 31st December 2024, the PineBridge Asia Dynamic Asset Allocation Fund Class "L" returned 4.95%. Over the same period, the Fund's benchmark index, a blended index of 60% of the MSCI All Country Asia Pacific ex-Japan Daily Total Return Index and 40% of the JP Morgan Asia Credit Index (JACI) Composite Total Return Index returned 8.52%.

#### Portfolio Overview

Asian markets in 2024 saw volatility driven by macroeconomic events, geopolitical tensions, and regional dynamics. Early optimism stemmed from potential central bank rate cuts and enthusiasm for artificial intelligence. Despite a brief pullback in April due to high-interest rate concerns, robust tech earnings in Japan and South Korea and AI optimism fueled a recovery. Small- and mid-cap stocks gained momentum later in the year, supported by Fed rate cuts and China's pro-growth policies. While some emerging markets underperformed, technology and AI were consistent growth drivers. The bond market also experienced turbulence, influenced by inflation and central bank actions. Quarter 1 reflected higher-than-expected bond yields, as major central banks held rates steady, apart from the Bank of Japan ending negative rates. Yields fluctuated in quarter 2 with disinflation trends reducing US Treasury yields by quarter 3, though strong job data later dampened rate cut hopes. German bonds benefited from ECB easing signals, while geopolitical risks in quarter 4 boosted demand for US and German bonds. Currency markets saw the USD rally early on, backed by strong US labor data, before dovish Fed expectations caused a setback in quarter 3. However, the dollar rebounded in quarter 4, pressuring major and emerging market currencies.

Against a volatile backdrop, the sub-fund underperformed the benchmark in 2024. Our Equity segment detracted from performance whereas the fixed income segment contributed. Within our equity allocation, the underweight position in Australia provided the strongest support, while the Hong Kong and India Equities benefited from effective selection. On the other hand, the major drag in performance was due to our exposures in China, Thailand, and Korea, mainly due to security selection. The underperformance in these regions was driven by concerns about a potential trade war, ongoing worries over economic growth, the risk of tariffs, and a slower-than-expected recovery. In fixed income, our allocation to China, Indonesia, and Australia contributed to performance, whilst our exposures in Pakistan, Macau, and Hong Kong detracted.

#### Portfolio Outlook

Disinflation in the US has flatlined, with goods recovering from deep deflation and key services like shelter and car insurance beginning to decline. Without significant policy changes from the Trump administration, this trend is expected to persist until mid-year before disinflation resumes. While aggressive tariff and immigration policies could shift disinflation into reflation, a measured approach alongside trade recalibrations is more likely, with temporary pressures like China's fiscal stimulus and tariff adjustments modestly lifting industrial commodity prices. The Fed has raised inflation forecasts, reacting to base effects and potential policy risks, yet we view these pressures as a buying opportunity ahead of expected productivity gains and disinflation resuming in late 2025. Reaffirming our Risk Dial Score of 2.5 (RDS 1.0 = most bullish, 3.0 = neutral, 5.0 = most bearish), we maintain confidence in equities outlook, supported by stronger growth and easing inflation in the coming cycle. While geopolitical uncertainties may drive market volatility, we stand ready to adjust risk exposure opportunistically during headline-driven corrections.

## Statement of Manager's Responsibilities

The Manager is responsible for preparing the Annual Report and the Financial Statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law). In preparing these Financial Statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards and identify the standards in question subject to any material departure from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that each Sub-Fund will continue in operation.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Fund and to enable it to ensure that the Financial Statements are prepared in accordance with FRS 102 and comply with the provisions of the Prospectus, Trust Deed and the UCITS Regulations. The Manager has appointed State Street Fund Services (Ireland) Limited (the "Administrator") to maintain the accounting records of the Fund at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud, error and other irregularities.

Under the UCITS Regulations, the assets of the Fund are entrusted to the Depositary for safe-keeping.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on PineBridge's website ([www.pinebridge.com](http://www.pinebridge.com)). Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

During the course of the year, regulation around sustainability-related disclosures continued to evolve, through the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) (the "SFDR") and the EU Taxonomy Regulation (Regulation (EU) 2020/852, and amending SFDR) (the "Taxonomy Regulation") and their associated regulatory technical standards and available guidance. Additional disclosure requirements under SFDR Level 2 are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the Sub-Funds can be found in Appendix III of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in Appendix III should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Managers, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

## Connected Persons

Regulation 43 of the Central Bank (Supervision And Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations") "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

## Statement of Manager's Responsibilities (continued)

### Connected Persons (continued)

As required under UCITS Regulation 81 (4), the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by UCITS Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

### ON BEHALF OF THE BOARD OF THE MANAGER:

Director

Director

Date: 10 April 2025

## Depository's Report to the Unitholders of PineBridge Global Funds

We have enquired into the conduct of the Manager in respect of PineBridge Global Funds (the "Trust") for the financial year ended 31 December 2024, in our capacity as Depository to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

### Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

### Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed.

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and;

(ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

### Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Depository by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 [Section 48(1)] (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

\* Management fees are shown net of fee caps, where applicable.

Gains and losses arose solely from continuing operations with the exception of the PineBridge China A-Shares Quantitative Fund, PineBridge Emerging Europe Equity Fund and PineBridge Global Emerging Markets SDG Corporate Bond Fund which have been prepared on a non going concern basis. There were no gains or losses other than those dealt with in the Statement of Comprehensive Income. There was no activity during the financial year for PineBridge Global Emerging Markets Bond Fund and PineBridge Global Emerging Markets Local Currency Bond Fund, which terminated in prior financial years, therefore there is no Statement of Comprehensive Income presented for those funds.

ON BEHALF OF THE BOARD OF THE MANAGER

\* Management fees are shown net of fee caps, where applicable.

\*\* The Fund ceased operations on 17 January 2024.

Gains and losses arose solely from continuing operations with the exception of the PineBridge China A-Shares Quantitative Fund, PineBridge Emerging Europe Equity Fund and PineBridge Global Emerging Markets SDG Corporate Bond Fund which have been prepared on a non going concern basis. There were no gains or losses other than those dealt with in the Statement of Comprehensive Income. There was no activity during the financial year for PineBridge Global Emerging Markets Bond Fund and PineBridge Global Emerging Markets Local Currency Bond Fund, which terminated in prior financial years, therefore there is no Statement of Comprehensive Income presented for those funds.

ON BEHALF OF THE BOARD OF THE MANAGER

10 April 2025

\* Management fees are shown net of fee caps, where applicable.

Gains and losses arose solely from continuing operations with the exception of the PineBridge China A-Shares Quantitative Fund, PineBridge Emerging Europe Equity Fund and PineBridge Global Emerging Markets SDG Corporate Bond Fund which have been prepared on a non going concern basis. There were no gains or losses other than those dealt with in the Statement of Comprehensive Income. There was no activity during the financial year for PineBridge Global Emerging Markets Bond Fund and PineBridge Global Emerging Markets Local Currency Bond Fund, which terminated in prior financial years, therefore there is no Statement of Comprehensive Income presented for those funds.

ON BEHALF OF THE BOARD OF THE MANAGER

## Notes to the Financial Statements for the financial year ended 31 December 2024

### 1. ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these Financial Statements are set out below. The accounting policies applied are consistent with all the periods presented unless otherwise stated.

#### **BASIS OF PREPARATION AND PRESENTATION**

##### **a) Statement of compliance**

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 102, the financial reporting standard applicable in the UK and Republic of Ireland and the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). The financial statements have been prepared on a going concern basis, with the exception of PineBridge China A-Shares Quantitative Fund, PineBridge Global Emerging Markets Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Emerging Europe Equity Fund and PineBridge Global Emerging Markets Local Currency Bond Fund (all the "Sub-Funds") whose financial statements are prepared on a basis other than going concern as the Board of Directors of the Manager resolved to terminate these Sub-Funds. The Directors of the Manager approved the termination of these funds for strategic and commercial reasons.

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The Fund has continued to avail of the exemption available to open-ended investment funds under FRS 102 and is not presenting a cash flow statement.

All references to net assets throughout the document refer to Net Assets Attributable to Holders of Redeemable Participating Units unless otherwise stated, with the exception of PineBridge Asia Dynamic Asset Allocation Fund and PineBridge Greater China Equity Fund, which are prepared under Equity presentation and use the reference Net Assets.

##### **b) Consolidation**

FRS 102 sets out the conditions relating to parent undertakings and the preparation of consolidated financial statements for subsidiaries. FRS 102 typically defines controlling interest as ownership, directly or indirectly of over 50% of the outstanding voting shares of another entity. The results of the subsidiary undertakings are consolidated into the group Statement of Comprehensive Income from the date on which control over the operating and financial decision making is obtained. PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Accordingly, the Financial Statements of PineBridge Investments GF Mauritius Limited are consolidated in the PineBridge India Equity Fund, and therefore include the assets and liabilities and the profit/loss of PineBridge Investments GF Mauritius Limited for the financial year ended 31 December 2024 and financial year ended 31 December 2023.

All significant inter-fund accounts and transactions have been eliminated in the Consolidated Financial Statements of PineBridge India Equity Fund.

##### **c) New accounting pronouncements**

There are no new standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the Fund.

##### **d) Financial Assets and Financial Liabilities at fair value through profit or loss**

###### **i) Classification**

This category has two sub-categories: financial assets and liabilities held for trading and those designated by Directors at fair value through profit or loss at inception. Financial assets and financial liabilities are designated by the Manager at fair value through profit or loss at inception with the exception of financial derivative

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 1. ACCOUNTING POLICIES (continued)

#### d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

##### i) Classification (continued)

instruments which are held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

##### ii) Recognition and Derecognition

Purchases and sales of investments are recognised on trade receipt basis as disclosed on page 5. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

##### iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets or financial liabilities are measured at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial period in which they arise.

##### iv) Fair Value

###### Transferable Securities

Equity securities listed on a recognised stock exchange or traded on any other regulated market are valued at the last traded price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price does not, in the opinion of the Directors of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. Fixed income securities listed on a recognised stock exchange or traded on any other regulated market are valued at evaluated bid price as at the Statement of Financial Position date on the stock exchange or market which constitutes the principal market for such securities.

In the case of any security not listed, quoted or dealt in on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Directors of the Manager or other competent person appointed by the Directors of the Manager and approved for the purpose by the Trustee, using valuation techniques.

###### Collateralised Mortgage Obligations ("CMOs")

Some Sub-Funds may invest in securities with contractual cash flows, such as collateralised mortgage obligations. CMOs, a type of mortgage-backed security, are bonds that represent claims to specific cash flows from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests, known as tranches, according to a complicated deal structure. Each tranche may have different principal balances, coupon rates, prepayment risks, and maturity dates (ranging from a few months to twenty years).

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

The fair value of CMOs are based on quoted market prices and are valued at the evaluated bid price.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 1. ACCOUNTING POLICIES (continued)

#### d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

##### iv) Fair Value (continued)

###### **Forward Foreign Currency Exchange Contracts**

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Changes in the value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are recognised as unrealised gains or losses on forward foreign currency exchange contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open forward foreign currency exchange contracts and open foreign currency exchange spot contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund.

###### **Investment Funds**

Investments in open-ended investment funds are estimated at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the net asset value of these units is recognised as net gain/(loss) on investment activities at fair value through profit or loss. The fair value of investments in exchange traded investment funds are based on quoted market prices and are valued at the last traded price.

###### **Futures Contracts**

The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as at the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised in the Statement of Comprehensive Income. For each relevant Sub-Fund, gains or losses on open futures contracts are included in the unrealised gain/(loss) on financial derivative instruments on the Statement of Financial Position and are shown in the Schedule of Investments of each relevant Sub-Fund. Initial margin deposits are made upon entering into futures contracts and are generally included in cash or cash equivalents.

###### **Total Return Swaps and Credit Default Swaps**

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loan, or bond. The fair value of the swaps is determined based on the mark to market valuation, which makes assumptions that are based on market conditions existing on each Statement of Financial Position date. The difference between the stated terms of the swap contract and the prevailing market conditions are recorded as movement in net unrealised gains or losses on investments in the Statement of Comprehensive Income. Unrealised gains and losses on total return swaps are included in the unrealised gain or loss on financial derivative instruments in the Statement of Financial Position.

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the Statement of Financial Position. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller.

The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cashflows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cashflows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors. The fair value calculations are completed daily and provided to the Administrator by a pre-approved independent valuation agent.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 1. ACCOUNTING POLICIES (continued)

#### d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

##### iv) Fair Value (continued)

###### **To-Be-Announced ("TBA") Purchase/Sale Commitments**

The Sub-Funds may enter into TBA commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price and par amount have been established, the actual securities have not been specified. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The Sub-Funds hold, and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Sub-Funds may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date.

The Sub-Funds may also enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction, or other liquid assets in an amount equal to the notional value of the TBA sale commitment are segregated. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the Sub-Funds realise a gain or loss. If the Sub-Funds deliver securities under the commitment, the Sub-Funds realise a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into.

TBA commitments, which are accounted for as purchase and sale transactions, may be considered securities themselves, and involve a risk of loss due to changes in the value of the security prior to the settlement date as well as the risk that the counterparty to the transaction will not perform. Counterparty risk is mitigated by having a master agreement between the Sub-Funds and the counterparty. Unsettled TBA commitments are valued at their fair value. The contract is marked to market daily and the change in fair value is recorded by the Sub-Funds as an unrealised gain or loss. Based on market circumstances, the Manager will determine whether to take delivery of the underlying securities or to dispose of the TBA commitments prior to settlement. The Sub-Funds did not hold any TBA commitments as at 31 December 2024 and 31 December 2023.

###### **Investment Gains/(Losses)**

Unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss are included in the Statement of Comprehensive Income in the financial period in which they arise.

Realised gains and losses on investment transactions, excluding debt instruments, are calculated using the average cost method. Realised gains and losses on investments transactions in debt instruments are calculated as the difference between sales proceeds and the average cost of the instrument. Gains and losses realised on the sale of all financial assets and financial liabilities carried at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

##### v) **Critical Accounting Estimates and Assumptions**

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities predominantly relate to the fair value of financial instruments.

###### *Fair-value of financial instruments*

The Sub-Funds may, from time to time, hold financial instruments that are not quoted in active markets, such as over-the-counter derivatives. Fair values of such instruments may be determined by using valuation techniques. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis and other valuation techniques commonly used by market participants. Where valuation

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 1. ACCOUNTING POLICIES (continued)

#### d) Financial Assets and Financial Liabilities at fair value through profit or loss (continued)

##### v) Critical Accounting Estimates and Assumptions (continued)

techniques are used to determine fair values, they are validated and periodically reviewed by experienced personnel at the Administrator, independent of the party that determined them and validated with the Investment Manager.

##### *Capital gains tax*

The Sub-Funds currently incur taxes imposed by certain countries on capital gains. Such gains are recorded gross of capital gains tax in the Statement of Comprehensive Income. Capital gains tax, where it occurs, is shown as a separate item in the Statement of Comprehensive Income.

##### vi) Cash at Broker/Amounts due to Broker/Cash held with Broker as Collateral

Cash at broker may comprise of margin cash held with brokers for futures contracts traded by the Sub-Funds, a portion of which may be restricted to cover initial margin requirements, and Cash held with broker as collateral may comprise of cash held by counterparties for collateral purposes for open over-the-counter ("OTC") financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant Sub-Fund and is recorded as an asset on the Statement of Financial Position.

Amounts due to broker may comprise of margin cash and cash collateral pledged by counterparties for OTC financial derivative instruments held by the Sub-Funds. Such cash remains in the ownership of the relevant counterparty and a related liability to repay the cash is recognised as "Amounts due to broker" on the relevant Sub-Fund's Statement of Financial Position.

##### vii) Cash at bank

Cash at bank comprises of cash balances held at State Street Bank & Trust Company or by the relevant appointed Sub-Custodian. Cash held in the functional currency of the relevant Sub-Fund is valued at cost, which approximates fair value. Cash held in currencies other than the functional currency of the Sub-Fund is initially recognised at cost using the relevant currency exchange rates on date of purchase and subsequently recognised at fair value using the relevant currency exchange rates as at the Statement of Financial Position date.

##### viii) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Sub-Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the Sub-Fund shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, loans, investment funds, forwards, futures contracts and swaps are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each Sub-Fund. Depository transactions costs are included in trustee and sub-custodian fees in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable transaction costs. The total costs incurred by each Sub-Fund during the financial year are disclosed in Note 8.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 1. ACCOUNTING POLICIES (continued)

#### e) Income from Investments

##### i) Bond Income

Interest income is recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

##### ii) Dividend Income

Dividend income arising on the underlying investments of a Sub-Fund is recognised as income in the Statement of Comprehensive Income of the relevant Sub-Fund on the dates on which the relevant securities are listed as "ex-dividend". In accordance with FRS 102, dividend income is reported gross of any irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

##### iii) Other Income

Other income is recognised in the Statement of Comprehensive Income on an accruals basis.

#### f) Expenses

Each Sub-Fund pays all of its expenses and such proportion of the Fund's expenses as is allocated to that Sub-Fund, other than those expressly assumed by the Manager. The costs and gains/(losses) of any hedging transactions will be attributable to the relevant unit Class. To the extent that expenses are attributable to a specific unit Class of a Sub-Fund, that unit Class bears such expenses. All expenses, as disclosed in the Statement of Comprehensive Income, are accrued on a daily basis.

#### Capital Gains Taxation

The Sub-Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Capital gains taxes are shown as a separate item under taxation in the Statement of Comprehensive Income.

#### g) Foreign Exchange

The functional currency of the Sub-Funds is US Dollar, the currency of the primary economic environment in which each Sub-Fund operates. US Dollar is also the presentational currency of the Sub-Funds.

The cost of investments and other transactions in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling at the time of the transaction. The fair value of the investments, other assets and other liabilities in currencies other than the functional currency of each Sub-Fund have been translated at the rates of exchange ruling as at financial year end. The resulting profits or losses are accounted for in the Statement of Comprehensive Income.

#### h) Distribution Policy

The Manager may declare a distribution once a year out of the net income (whether in the form of dividends, interest or otherwise) available for distribution by a Sub-Fund and the realised profits less realised losses and unrealised profits less unrealised losses (capital). The Manager may also declare interim distributions on the same basis. Distribution frequency varies between share classes and is outlined in the Prospectus. Some Sub-Funds may distribute on a more frequent basis, see details below.

Class YYDC Units USD	Monthly

Unitholders may elect in an application for units either to receive distributions in cash or to reinvest the distribution amount in further units. For Sub-Funds whose units are classified as liability, the distributions to Unitholders are recognised as Finance Costs in the Statement of Comprehensive Income. Distributions reinvested are disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders.

#### i) Income Equalisation

Income equalisation arrangements are applied in the case of subscriptions to and redemptions from certain Sub-Funds. The NAV per redeemable participating unit as calculated on each Dealing Day has an income element and a capital element. In relation to any subscription or redemption, the monies received or paid are allocated proportionately to or from income and capital in a Sub-Fund. These arrangements are intended to ensure that the income per redeemable participating unit, which is distributed in respect of any distribution period for which a distribution is made, is not affected by changes in the number of redeemable participating units in issue during that period. The calculation of equalisation is based on net income. Income equalisation is in operation in PineBridge Asia ex Japan Small Cap Equity Fund, PineBridge Asia Pacific Investment Grade Bond Fund, PineBridge Asian High Yield Total Return Bond Fund, PineBridge Global Emerging Markets SDG Corporate Bond Fund, PineBridge Global Focus Equity Fund, PineBridge USD High Yield Bond Fund and PineBridge USD Investment Grade Credit Fund.

#### j) Unit Classes

##### i) Redeemable Participating Units

Redeemable participating units are redeemable at the unitholder's option and are classified as financial liabilities. The redeemable units can be repurchased by the Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV. The redeemable unit is carried at the redemption amount that is payable at the Statement of Financial Position date if a unitholder exercised his or her right to have the Fund repurchase his or her unit. In accordance with the Prospectus, for the relevant Sub-Funds, the Fund is contractually obliged to redeem units at dealing prices and the liability to redeemable participating unitholders reflects this. Monetary value unit transactions during the financial year are recognised in the Statement of Changes in Net Assets Attributable to Redeemable Participating Unitholders of the relevant Sub-Fund. The units of all Sub-Funds are classified as financial liabilities with the exception of PineBridge Greater China Equity Fund and PineBridge Asia Dynamic Asset Allocation Fund at 31 December 2024 and PineBridge Asia Dynamic Asset Allocation Fund at 31 December 2023, where units are classified as equity.

IAS 32: Financial Instruments presentation requires that units are classified as equity when all the criteria within IAS 32 para 16a-e are met. As at 31 December 2024 the units of PineBridge Asia Dynamic Asset Allocation Fund have met all the criteria of IAS 32 therefore the classification changed from financial liabilities to equity. See details in (ii) below.

##### ii) Equity Units

Equity units are also redeemable at the Unitholder's option. Each equity unit can be repurchased by the Sub-Fund at any time for cash equal to a proportionate share of the Sub-Fund's NAV.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 2. DEALING NET ASSET VALUE (continued)

#### Reconciliation of Net Asset Value per Financial Statements to Net Asset Value per dealing NAV

The NAV at which unitholders may subscribe or redeem (i.e. the "dealing NAV") may differ from the NAV disclosed in the financial statements due to a difference in the Valuation Date as per the prospectus and the financial year end date.

In line with the Prospectus, the final 2024 Valuation Date for PineBridge Japan Equity Fund, PineBridge Japan Small Cap Equity Fund and PineBridge Latin America Equity Fund was 30 December 2024. As these financial statements were prepared to 31 December 2024, all transactions which occurred on these Sub-Funds between their respective final 2024 Valuation Date and 31 December 2024 have been accounted for in these Financial Statements and the Sub-Funds investments have been fair valued using the last traded market prices available as at 31 December 2024. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2024 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2024 Valuation Date for these Sub-Funds.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for the Sub-Funds as at 31 December 2024.

	PineBridge Japan Equity Fund USD	PineBridge Japan Small Cap Equity Fund USD	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	55,483,349	39,637,844	51,537,363
Total transactions adjustment	(581,537)	(450,077)	(108,274)
Net Asset Value per dealing NAV	<u>54,901,812</u>	<u>39,187,767</u>	<u>51,429,089</u>

In line with the Prospectus, the final 2023 Valuation Date for PineBridge Latin America Equity Fund was 28 December 2023. As these financial statements were prepared to 31 December 2023, all transactions which occurred on the Sub-Fund between the respective final 2023 Valuation Date and 31 December 2023 have been accounted for in these Financial Statements and the Sub-Fund's investments have been fair valued using the last traded market prices available as at 31 December 2023. All assets and liabilities not denominated in USD were converted to USD using the relevant exchange rates as at 31 December 2023 as presented in Note 10. The dealing NAV and dealing NAV per unit as disclosed earlier in this note is that of the final 2023 Valuation Date for the Sub-Fund.

The following is the reconciliation between the NAV in the financial statements and the NAV as per dealing NAV for these Sub-Funds as at 31 December 2023.

	PineBridge Latin America Equity Fund USD
Net Asset Value per Financial Statements	79,636,228
Total transactions adjustment	1,075,766
Net Asset Value per dealing NAV	<u>80,711,994</u>

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 4. CASH AND COLLATERAL

#### (i) Cash at Bank

All cash holdings and bank overdrafts as at 31 December 2024 and 31 December 2023 are held at State Street Bank & Trust Company ("State Street"), the relevant appointed Sub-Custodian, or Bank of America, with the exception of cash at broker and cash held with brokers as collateral, which are held with the relevant counterparties for the financial derivative instruments. See the note below for further details of cash at broker and cash held with brokers as collateral.

#### (ii) Cash at Broker, Amounts due to Broker and Cash held with Broker as collateral

The following table outlines the Sub-Funds margin cash position for Futures Contracts as at 31 December 2024 and 31 December 2023:

Sub-Fund Name	Counterparty	Margin Cash	
		31 December 2024	31 December 2023
PineBridge Asia Pacific Investment Grade Bond Fund	Goldman Sachs	USD3,192,249	USD1,385,777
PineBridge Global Bond Fund	Morgan Stanley	USD 80,720	USD 158,014
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD4,694,052	USD7,561,422
PineBridge Global Multi Asset Alpha Fund	Morgan Stanley	USD3,295,966	USD8,489,845
PineBridge Asia Dynamic Asset Allocation Fund	Morgan Stanley	USD1,605,236	USD1,351,223

As at 31 December 2024 and 31 December 2023, all of this margin cash is restricted due to initial margin requirements by the relevant brokers.

The following table outlines the Sub-Funds cash collateral held for forward foreign currency exchange contracts as at 31 December 2024 and 31 December 2023:

Sub-Fund Name	Counterparty	Cash Collateral	
		31 December 2024	31 December 2023
PineBridge Global Dynamic Asset Allocation Fund	JP Morgan Chase Bank	USD -	USD 500,000
PineBridge Global Dynamic Asset Allocation Fund	Morgan Stanley	USD -	USD 500,000
PineBridge Global Dynamic Asset Allocation Fund	UBS AG	USD1,400,000	USD -
PineBridge Global Multi Asset Alpha Fund	Morgan Stanley	USD1,520,000	USD1,550,000
PineBridge Global Multi Asset Alpha Fund	UBS AG	USD 150,000	USD -
PineBridge Global Bond Fund	Standard Chartered Bank	USD -	USD 20,000

The following table outlines the Sub-Funds cash collateral held for Total Return Swaps Contracts as at 31 December 2024 and 31 December 2023:

Fund Name	Counterparty	Cash Collateral	
		31 December 2024	31 December 2023
PineBridge Global Multi Asset Alpha Fund	Morgan Stanley	USD 4,598,000	USD -

#### (iii) Collateral

When entering into an OTC derivative instrument and during the term of that transaction, the Sub-Funds and/or the counterparty may post or receive securities as collateral and/or margin related to changes in the market value of the derivative. Additionally, the counterparty may require additional collateral and/or margin that is unrelated to changes in the market value of the derivative. If the counterparty enters into insolvency proceedings or otherwise defaults on its obligations, the ability of the Sub-Funds to recover collateral posted to the counterparty may be delayed or limited. Investments pledged by the Sub-Funds as collateral are recognised at fair value in the relevant Sub-Fund's Schedule of Investments. The nominal value and market value of the underlying securities pledged as collateral and/or margin to the Morgan Stanley as at 31 December 2024 were: USD 134,614 (nominal value of 200,000) as held on PineBridge Global Bond Fund, as at 31 December 2023: USD 150,181 (nominal value of 200,000) as held on PineBridge Global Bond Fund. See the Sub-Fund's Schedule of Investments for the securities pledged as collateral.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 5. EFFICIENT PORTFOLIO MANAGEMENT

A Sub-Fund may employ FDI for the purposes of hedging and efficient portfolio management purposes and shall be understood to fulfil the following criteria as set out in the UCITS Regulations:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
  - (i) reduction of risk;
  - (ii) reduction of cost;
  - (iii) generation of additional capital or income for the Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund and the risk diversification rules set out in the UCITS Regulations;
- (c) their risks are adequately captured by the risk management process of the Sub-Fund; and
- (d) they cannot result in a change to the Sub-Fund's declared investment objectives or add supplementary risks in comparison to the general risk policy as described in the sales documents.

For efficient portfolio management purposes, the Sub-Funds may enter into repurchase agreements, reverse repurchase agreements and/or stock lending agreements, subject to the conditions and limits set out in the UCITS Regulations, to generate additional income for the Fund. During the financial year the following Sub-Funds used derivatives for efficient portfolio management techniques: PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Bond Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Multi Asset Alpha Fund. The remaining Sub-Funds did not utilise these efficient portfolio management techniques.

### 6. FINANCIAL RISK MANAGEMENT

#### (a) General Risk Management Process

Each Sub-Fund is exposed to market price risk, interest rate risk, credit risk, liquidity risk and currency risk arising from the financial instruments it holds. The Sub-Funds' overall risk management programme focuses on the volatility of financial markets and seeks to minimise potential adverse effects on financial performance.

The risk management policies (which have not changed in 2024) employed to manage these risks for the financial years ending 31 December 2024 and 31 December 2023 are outlined below.

PineBridge Investments (the "Firm") is a group of international companies that provides investment advice and markets asset management products and services to clients around the world. The Firm's approach to risk management and controls is a bottom-up led process with top-down controls imposed by the boards of directors of the Firm and the Manager as appropriate, for the establishment of firm-wide risk management and controls.

The Manager has established and maintains its own permanent risk management function in discharge of its obligations under the UCITS Regulations. The Manager has also established a risk committee which meets regularly to focus specifically on risk attached to the activities of the Fund (the "Risk Committee").

The board of directors of each individual company within the Firm has risk management responsibilities as defined by best practices and guidelines, and applicable laws and regulations. In this regard the Firm has established the Risk Management Department, the Global Risk and Compliance Committee ("GRCC") and Business Management to assist and report to the board of directors of the Firm.

The Risk Management Department is hierarchically and functionally independent from operating units of the Firm which allows for the independent performance of the risk management activities, having taken into account the nature, scale and complexity of its business and the funds it manages.

The GRCC is tasked with assisting the board of directors of the Firm in evaluating and assessing the different types of risk to which the organization is exposed. The members of the GRCC have direct access to, and receive regular reports from management. The GRCC is comprised of representatives from Executive Management, Compliance, Investment Management, Risk Management, Operations, Finance, Legal and IT. The GRCC consists of a number of risk sub-committees, with roles and responsibilities defined in the Committee Charters.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### (a) General Risk Management Process (continued)

Business Management is responsible for executing the organisation's risk management process.

The Firm has a comprehensive risk management process to monitor, evaluate and manage the principal risks it assumes in conducting its activities.

The Sub-Funds are also required to adhere to investment and borrowing restrictions laid down by the UCITS Regulations.

Among other restrictions, the Sub-Funds are restricted to holding a maximum of 10% of the total NAV of the Sub-Fund in any one particular security, with certain exceptions allowed. Compliance with these restrictions is monitored by the Manager's Compliance Team as well as the relevant Investment Manager and the Trustee. In addition to the investment and borrowing restrictions, the investment objective and policy of each Sub-Fund contains specific investment parameters and these are set out in detail in the Prospectus.

#### (b) Market Risk

This is the risk where the fair value or future cash flows of a financial instrument can fluctuate because of changes in market prices relating to: changes in actual market prices, interest rate and currency movements.

##### i) Global Exposure

Per the UCITS Regulations, and as part of the risk management and reporting requirements, the Fund must be monitored and measured in accordance with the regulatory requirements. In accordance with the regulatory requirements, global exposure can be calculated in two ways, either:

- (i) the Commitment Approach that calculates the incremental exposure generated by the instruments held in the Sub-Funds.
- (ii) Value at Risk ("VaR"), where complex investment strategies are used. VaR measure estimates the potential loss of the portfolio over a pre-defined period of time given a specified confidence level. VaR methodology is a statistical measurement that produces a single aggregate result for the overall portfolio, taking into consideration the market volatilities of all the markets and assets as well as their correlations allowing for offsetting across different assets and markets.

The Commitment approach is used to calculate global exposure for all Sub-Funds, with the exception of the PineBridge Global Multi Asset Alpha Fund which uses the VaR analysis. The Commitment approach converts any Sub-Fund's derivative financial positions into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed on the Statement of Financial Position for the applicable Sub-Funds.

In calculating the VaR, the following parameters are used:

- a confidence level of 99%;
- a holding period of 21 days;
- a historical observation period, where applicable, of at least 1 year.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### (b) Market Risk (continued)

##### i) Global Exposure (continued)

The Sub-Fund applies a back-testing methodology to regularly assess the performance of the VaR model. We believe our VaR model remains a reasonable basis for assessing market risk within the Sub-Fund but we will continue to assess its performance and make adjustments when necessary.

The calculation of the VaR limit during the year for the PineBridge Global Multi Asset Alpha Fund are as follows:

Sub-Fund	Var limit at 31 December 2024	Maximum	Minimum	Average
PineBridge Global Multi Asset Alpha Fund	20.00%	4.86%	1.73%	2.92%

Sub-Fund	Var limit at 31 December 2023	Maximum	Minimum	Average
PineBridge Global Multi Asset Alpha Fund	20.00%	2.83%	1.50%	2.06%

##### ii) Market Price Risk

Market price risk arises from uncertainty about future prices of financial instruments held. It represents the potential loss the portfolios might suffer through price movements.

The Investment Managers consider the asset allocation of the Sub-Funds in order to manage the risk associated with exposure to currencies which are not in the base (or functional) currency of the Sub-Fund, countries, industry sectors and individual securities, whilst continuing to follow the Sub-Funds' investment objectives.

The Investment Managers are engaged in substantial research activity and engage in a wide variety of meetings to identify, communicate, analyse and mitigate market risks. These range from daily economics and Investment Manager conference calls to discuss macroeconomic trends and fixed income market risk, weekly and bi-weekly fixed income and equity market reviews, bi-weekly currency meetings and monthly global asset allocation meetings which cross investment teams, and ensure that Investment Managers have a current, well vetted view of the global financial markets.

Management of risk relative to benchmarks as discussed above is ultimately the responsibility of the Investment Manager of each Sub-Fund.

Senior Investment Managers provide oversight for the Sub-Funds and are accountable for ensuring application of the Firm's investment process. This is achieved through monthly reviews of both performance and application of investment strategy. In addition, the Compliance Department in the Firm provides real time monitoring of the consistency of application of the UCITS investment restrictions for all Sub-Funds.

Holdings in the equity and balanced Sub-Funds are constantly monitored to determine whether any of the evaluated factors have changed or if a stock has hit valuation targets. If valuation targets are achieved, the holdings are sold.

For fixed income Sub-Funds, the Investment Manager's focus on a pro-active risk control process. Risk measurement and monitoring is focused on the ex-ante investment decision process resulting from the manager's investment process as implemented in the Sub-Fund. Sub-Funds are well diversified without overly replicating the benchmark.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### (b) Market Risk (continued)

##### ii) Market Price Risk (continued)

The table below sets out the beta for the Equity and Balanced Sub-Funds as at 31 December 2024 and 31 December 2023. Beta is being used in the below analysis as a proxy for VaR analysis.

Sub-Fund	Benchmark (BM)	Beta 31/12/24	Beta 31/12/23

\* PineBridge China A-Shares Quantitative Fund terminated on 30 September 2024.

The Sub-Funds' exposure to market price risk at 31 December 2024 and 31 December 2023 is equivalent to the fair values of investments held, as detailed on the Statement of Financial Position.

#### Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2024 and 31 December 2023;
- the market price risk information is a relative estimate of risk rather than a precise number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### (b) Market Risk (continued)

##### ii) Market Price Risk (continued)

- future market conditions could vary significantly from those experienced in the past.

##### iii) Interest Rate Risk

This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Sub-Funds which hold fixed interest rate debt securities are exposed to fair value interest rate risk where the value of these securities may fluctuate as a result of a change in market interest rates. Sub-Funds which also hold a number of floating/adjustable interest rate debt securities, which are re-priced periodically in line with market interest rate movements prior to maturity date are exposed to cash flow interest rate risks.

Floating rate bonds are structured with a floating rate payment structure, whereby a fixed basis point spread is paid over the prevailing reference rate, typically 3 month SOFR or EURIBOR, and reset on a quarterly or semi-annual basis. However, the total interest earned on investments will vary from time to time with changes in the underlying reference rate.

The Sub-Funds' exposure to interest rate risk is detailed in the relevant Schedule of Investments.

All other financial assets and financial liabilities, with the exception of equities, cash at bank balances and bank overdrafts, held by the Sub-Funds are not directly exposed to interest rate risk. The Sub-Funds are exposed to interest rate risk on the interest earned on its cash and bank balances and bank overdrafts. This exposure is not considered to be significant.

Interest rate (duration) risks are managed by the Investment Managers whose management of duration risk is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning held with senior managers. Individual managers are authorised to initiate fixed income trades within pre-set limits.

#### Interest Rate Risk Sensitivity

Duration is a measure of the sensitivity of a bond price to interest rates. The percentage change in the price is equal to the change in interest rates multiplied by the modified duration. The monetary impact detailed in the following table shows the possible change in NAV resulting from a 1% change in interest rates.

Sub-Fund	Average Duration 31/12/24	Monetary impact on NAV (100bps) 31/12/24	Average Duration 31/12/23	Monetary impact on NAV (100bps) 31/12/23
PineBridge Asia Pacific Investment Grade Bond Fund	4.70	20,556,086	5.48	20,338,617
PineBridge Asian High Yield Total Return Bond Fund	2.29	2,677,825	2.06	3,053,043
PineBridge Global Bond Fund	6.53	2,080,980	6.67	2,810,345
PineBridge Global Dynamic Asset Allocation Fund	5.86	17,231,730	2.69	11,433,379
PineBridge Global Multi Asset Alpha Fund	0.74	1,519,562	2.65	4,116,174

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

PineBridge Asia Dynamic Asset Allocation Fund	4.24	1,746,124	4.42	1,855,044

\* PineBridge Global Emerging Markets SDG Corporate Bond Fund terminated on 17 January 2024.

##### Some limitations of sensitivity analysis are:

- this methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns; and
- this methodology provides a sensitivity snapshot based on data available as at 31 December 2024 and 31 December 2023.

#### iv) Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Currency risks are managed by the individual Investment Managers. Their performance is monitored through regular performance reviews with senior managers, as well as through monthly peer reviews of positioning and compliance that are held with senior managers and the Compliance Department. Individual managers must be authorised to initiate FX trades within pre-set trade limits for individual transactions.

PineBridge US Research Enhanced Core Equity Fund and PineBridge USD Investment Grade Credit Fund were not exposed to any significant foreign currency risk at 31 December 2024 or at 31 December 2023, as all of their assets and liabilities were denominated in their functional currency.

In certain cases, the Sub-Funds hold assets and liabilities denominated in currencies other than the functional currency and are therefore exposed to currency risk as the value of securities denominated in other currencies will fluctuate due to change in exchange rates. Certain Sub-Funds use derivatives to hedge currency risk.

All Sub-Funds have been authorised by the Central Bank to use certain FDI for hedging purposes and investment purposes.

As an authorised UCITS legal manager, the Manager is required to file a Risk Management Process document with the Central Bank. This document provides an overview of the Firm's policy on derivatives risk management including, but not limited to: an overview of FDI used, counterparty risk exposure, calculation of global exposure,

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

6. FINANCIAL RISK MANAGEMENT (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

leverage and cover requirements, expertise required and in place to invest in FDI, valuation rules, legal risk and reporting requirements. The Sub-Funds use only a limited number of simple FDI solely for non-complex investment, hedging and replication purposes.

The Sub-Funds hold both non-monetary assets, such as equities and investment funds and monetary assets and liabilities, such as debt instruments, futures contracts, forward foreign exchange contracts, swap contracts, cash at bank, cash at broker, debtors and creditors in currencies other than USD. FRS 102 considers the foreign exchange exposure relating to non-monetary assets and liabilities are a component of market price risk not foreign currency risk. However, management monitors the exposure on all foreign currency denominated assets and liabilities.

The following tables detail Sub-Funds with material currency exposures as at 31 December 2024 and 31 December 2023. Sub-Funds not listed below do not have material currency exposures as at the Statement of Financial Position date. Material currency exposure is where the total monetary amount is greater than 5% of the NAV of the Sub-Fund.

Forward Foreign Exchange Contracts

The Sub-Funds listed on pages 220 to 224 may engage in forward foreign exchange contracts for investment purposes or for hedging purposes, to alter the currency exposure of the underlying assets, in accordance with the limits set out by the Central Bank. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction. Forward foreign exchange contracts are OTC traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires and a new forward to replace the expired one cannot be put into place at the

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

(b) Market Risk (continued)

iv) Currency Risk (continued)

same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

In relation to hedged classes listed below, it is the intention of the Manager or its delegate to hedge the currency exposure between the denominated currency of the hedged class and the base currency of the Sub-Fund. The Manager or its delegate will seek to achieve this hedging by using FDI, including but not limited to forward foreign exchange contracts as set out, and within the conditions and limits imposed, by the Central Bank. The details of hedged classes used by Sub-Funds as at 31 December 2024 and 31 December 2023 are outlined below:

31 December 2024 Sub-Fund	Class	Currency	Counterparty	Unrealised Gains/Losses on Forwards

#### c) Credit Risk

This is the risk that one party to a financial instrument or transaction will cause a financial loss for the other party by failing to discharge an obligation when it falls due. This includes counterparty risk and issuer (or investment) risk. In relation to the Sub-Funds, it can arise from receivables from another party, placing deposits with other entities, transacting in debt securities and entering into OTC FDI. For Sub-Funds investing in debt securities, the investment objectives and investment policies detailed in the supplements to the Prospectus provide details of the credit rating restrictions imposed on that Sub-Fund.

Leveraged loan obligations, if any, are subject to unique risks, including the possible invalidation of an investment as a fraudulent conveyance under relevant creditors' rights laws. In analysing each leveraged loan, the Manager compares the relative significance of the risks against the expected benefits of the investment.

Substantial research tools are available to the Investment Managers for use in the management of credit risk. These include extensive internally produced company and industry research, issue or industry specific 'brainpools', rating agency reports, purchased research databases, the Firm's online research library, internal R&D reports and other advanced credit risk management tools.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### c) Credit Risk (continued)

The Firm has a robust counterparty approval process. There are Regional Approval Committees (RACs) that are tasked with adding and removing counterparties as appropriate. The RACs approve and maintain lists of approved brokers. No transaction can take place with a broker until it has been approved and formally added to the Approved Broker List for the particular region. The lists are updated on a regular basis. The majority of the trades are executed on a Delivery Versus Payment basis. This ensures that the buyer's payment for securities is due at the time of delivery.

For OTC FDI such as total return swap contracts, the Investment Managers generally follow the standards set by the International Securities Dealers Association (ISDA) in its derivatives master agreements. ISDA swap confirmations are tracked and checked manually to confirm the terms of the trades are fully and correctly documented.

Collateral may be received from counterparties, as per the agreement with the counterparty to reduce counterparty risk.

Where the Sub-Fund provides collateral as a result of entering into total return swaps, it is exposed to the risk that the counterparty will be unable or unwilling to honour its obligations to return the collateral provided. The Sub-Fund may provide certain assets as collateral to counterparties in connection with total return swaps. If the Sub-Fund has over-collateralised (i.e., provided excess collateral to the counterparty) in respect of such transactions, it may be an unsecured creditor in respect of such excess collateral in the event of the counterparty's insolvency. If the Trustee or its subcustodian or a third party holds collateral on behalf of the Sub-Fund, the Sub-Fund may be an unsecured creditor in the event of the insolvency of such entity.

Listed below are the counterparties and banks used by the Sub-Funds and their respective long term credit ratings, as issued by Moody's rating agency, as at 31 December 2024 and 31 December 2023:

Counterparty	31 December 2024	31 December 2023
BNP Paribas SA	-	Aa3
Brown Brothers Harriman & Co.	-	NR
HSBC Bank Plc	Aa3	Aa3
JPMorgan Chase	-	A1
Morgan Stanley	A1	A1
Standard Chartered Bank	A1	A1
State Street Bank and Trust Company	Aa1	Aa2
UBS AG	Aa2	Aa2

#### Trustee and Depositary

The Fund's trustee is State Street Custodial Services (Ireland) Limited (the "Trustee" and "Depositary"). All transferable securities (with the exception of Bank Loans, if any and investment fund investments), cash and bank balances and bank overdrafts are held by the Trustee and Depositary through its affiliate, State Street Bank and Trust Company ("State Street") or through a sub-custodian within the State Street custodial network.

All OTC FDI, investment funds, margin or other similar investments/monies deposited by or entered into on behalf of the Fund with a counterparty, clearing broker or other parties are not held within the State Street custodial network. The Trustee and Depositary is therefore not liable in any way for the default of any counterparty.

In accordance with the requirements of the Prospectus and the UCITS Regulations, the Sub-Funds' securities are maintained within the Trustee and Depositary's custodial network in segregated accounts. The Trustee and Depositary will ensure that any agents and sub-custodians it appoints to assist in safekeeping the assets of the Sub-Funds will segregate the assets of the Sub-Funds. Bankruptcy or insolvency of the Trustee and Depositary, a State Street affiliate company or sub-custodian may cause rights with respect to cash and securities held by State Street to be delayed or limited and the Sub-Funds will be treated as a general creditor of that entity in respect of its

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### c) Credit Risk (continued)

cash balances. Periodic monitoring and an annual credit review are performed on the Trustee and Depository by the Manager. This review may include as appropriate an assessment of the Trustee and Depository's liquidity position, income streams, asset quality and credit ratings. The long term credit rating of State Street as at 31 December 2024 was Aa1 (31 December 2023: Aa2), as rated by Moody's rating agency.

The Fund has granted a continuing security interest by way of a charge over its assets to the Trustee and Depository and its affiliates, pursuant to the Trustee Agreement between the Fund, the Trustee, Depository and State Street, as continuing security for the payment, discharge and performance of its obligations.

Credit risk can arise from receivables such as subscription and investment sale transactions awaiting settlement. Risk relating to these unsettled receivables is considered small due to the short settlement period involved and in relation to subscription transactions, the due diligence performed on the portfolio clients. All transactions in securities are settled and paid for on delivery using approved brokers. The maximum exposure related to unsettled transactions equals the receivable amounts shown on the Statement of Financial Position.

There were no past due or impaired assets as at 31 December 2024 or at 31 December 2023.

Credit risk relating to fixed income securities has been analysed for the below listed Sub-Funds with the industry acceptable classification basis:

#### d) Liquidity Risk

Liquidity risk is the risk that a Sub-Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

For the financial year ended 31 December 2024 and 31 December 2023, each Sub-Fund's assets comprise of mainly readily realisable securities. However, not all securities purchased by a Sub-Fund will be listed or rated and consequently liquidity may be lower. Liquidity risk is a factor that the Investment Managers must consider when investing in any financial instrument in order to remain compliant with the portfolio liquidity requirement to the extent required by Regulation 104 (1) of the UCITS Regulations. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. Each Sub-Fund may also encounter difficulties in disposing of assets at their 'fair' market price due to adverse market conditions leading to limited liquidity.

Sub-Funds may invest in investments such as sovereign or corporate bond issues of fixed and/or floating rate which may be below investment grade, which as a result carry greater liquidity risk than investment grade sovereign or corporate bonds.

Some Sub-Funds may invest in securities with contractual cash flows, such as CMOs. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate values, delinquencies and/or defaults, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates. Investors in these securities may not only be subjected to this prepayment risk, but also exposed to significant market and liquidity risks.

Due to the unique and customised nature of loan agreements evidencing private debt assets and the private syndication thereof, these assets are not as easily purchased or sold as publicly traded securities. Although the range of investors in private debt has broadened, there can be no assurance that future levels of supply and demand in loan trading will provide the degree of liquidity in loan trading which currently exists in the market. In addition, the terms of these assets may restrict their transferability without borrower consent. The Manager will consider any restriction, along with all other factors, in determining whether or not to advise the Sub-Fund to acquire participation in each asset. There are no loans held as at 31 December 2024 and 31 December 2023.

The main financial liabilities of each Sub-Fund are the redemption of units awaiting settlement, purchases of investments awaiting settlement, withholding tax, capital gains tax, amounts due to broker, bank overdraft and

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### d) Liquidity Risk (continued)

expenses payable. As an open-ended Fund, each Sub-Fund is required to sell units back to unitholders at a price equivalent to the NAV per unit, subject to settlement and dealing restrictions laid down in the Fund's Trust Deed and Prospectus.

In certain situations the Manager may, with the consent of the Trustee, temporarily suspend the determination of the Net Asset Value of any Sub-Fund. Any such suspension would result in the suspension of the issuing and redemption of the relevant Sub-Fund's Units to and from its Unitholders during such period of suspension.

The Investment Managers manage each Sub-Fund's liquidity position on a daily basis. Also the Manager is able, through the provisions in the Prospectus, to defer the processing of redemptions of significant size to facilitate an orderly disposition of securities in order to protect the interests of the remaining unitholders. The maximum value of redeemable participating units available for redemption on any given day can be restricted by the Fund to 10% of the total net asset value of that Sub-Fund in issue.

There are no financial liabilities as at 31 December 2024 and 31 December 2023 that fall due over 1 month except for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund USD 308,893 (1-3 months) (31 December 2023: USD 64,817 (1-3 months)).

PineBridge Global Dynamic Asset Allocation Fund USD 3,150,032 (1-3 months) (31 December 2023: USD 2,621,255 (1-3 months)).

PineBridge Global Bond Fund USD 43,554 (1-3 months) (31 December 2023: USD 109,869 (1-3 months)).

PineBridge Global Multi Asset Alpha Fund USD 2,227,604 (1-3 months) (31 December 2023: 2,560,859 (1-3 months)).

The Sub-Funds' financial liabilities due for payment within 1 month relate, in the most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, withholding tax, bank overdraft interest, future contracts and other open forward foreign currency exchange contracts that were not mentioned above. Details of these amounts, where relevant, can be found in the Statement of Financial Position.

The financial liabilities due for payment over 1 month relate to forward foreign exchange contracts on the PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Multi Asset Alpha Fund, futures contracts held on the PineBridge Global Dynamic Asset Allocation Fund, PineBridge Asia Dynamic Asset Allocation Fund, PineBridge Global Bond Fund and PineBridge Global Multi Asset Alpha Fund, Credit Default Swaps and Total Return Swaps held on the PineBridge Global Multi Asset Alpha Fund, cash at broker and capital gains tax payable which is considered an open ended liability.

#### e) Fair Value Hierarchy

The Fund is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Fund is required to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### e) Fair Value Hierarchy (continued)

this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager, who considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The Global Valuation Committee meets quarterly, and additionally on an as needed basis to confirm and vote on all current fair valuations held within the portfolios at PineBridge. Valuation procedures, controls, and documentation are also presented and verified, and any changes to methodologies are presented to the committee for discussion and approval.

All of the Sub-Funds' holdings are classified as Level 1 except for the Sub-Funds' holdings to the values noted in the table below:

Sub-Fund	Level	31 December 2024 USD	31 December 2023 USD
PineBridge Asia ex Japan Equity Fund	2	(1,237)	2,818
PineBridge Asia ex Japan Small Cap Equity Fund	2	(833,314)	1,631,730
PineBridge Asia Pacific Investment Grade Bond Fund	2	417,128,701	358,810,932
PineBridge Asian High Yield Total Return Bond Fund	2	115,195,872	145,734,928
PineBridge Europe Research Enhanced Equity Fund	3	-	1,298
PineBridge Global Bond Fund	2	31,427,147	32,713,112
PineBridge Global Bond Fund	3	-	5,532,954
PineBridge Global Dynamic Asset Allocation Fund	2	66,170,719	125,258,022
PineBridge Global Multi Asset Alpha Fund	2	170,486,807	107,308,476
PineBridge Global Multi Asset Alpha Fund	3	9,280	9,280
PineBridge Global Emerging Markets SDG Corporate Bond Fund	2	-	32,445,954
PineBridge Global Emerging Markets SDG Corporate Bond Fund	3	-	6,152
PineBridge Global Focus Equity Fund	2	(837,644)	546,995
PineBridge India Equity Fund	2	(332)	438
PineBridge Japan Equity Fund	2	(195)	3,628
PineBridge Japan Small Cap Equity Fund	2	-	(43,752)
PineBridge US Large Cap Research Enhanced Fund	2	(346,360)	310,367
PineBridge USD High Yield Bond Fund	2	36,416,208	55,220,169
PineBridge USD High Yield Bond Fund	3	182,741	-
PineBridge USD Investment Grade Credit Fund	2	104,003,578	232,563,703
PineBridge USD Investment Grade Credit Fund	3	-	282,532
PineBridge Asia Dynamic Asset Allocation Fund	2	21,889,672	20,242,773

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, include active listed equities, futures contracts and investment funds, which are daily trading in an active market. The Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include, investment-grade corporate bonds, US and non-US sovereign obligations and OTC FDI.

Fixed Income securities held in the Sub-Funds listed on the previous table are classified under Level 2 as they were valued based on evaluated prices.

As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 6. FINANCIAL RISK MANAGEMENT (continued)

#### e) Fair Value Hierarchy (continued)

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include suspended or liquidated equity investments and corporate bonds. As at 31 December 2024 all Level 3 securities were carried at zero value except for 2 securities; Ozon Holdings PLC (ADL) held on PineBridge Global Multi Asset Alpha Fund and Saks Global Enterprises LLC held on PineBridge USD High Yield Bond Fund. As at 31 December 2023 all Level 3 securities were carried at zero value except for 14 securities; British Airways Pass-Through Trust held on PineBridge USD Investment Grade Credit Fund, six China Government Bonds and four China Development Bank securities held on PineBridge Global Bond Fund, OAS SA held on PineBridge Global Emerging Markets SDG Corporate Bond Fund, Ozon Holdings PLC held on PineBridge Global Multi Asset Alpha Fund and Bollore SE held on PineBridge Europe Research Enhanced Equity Fund.

During the financial year ended 31 December 2024 China Development Bank held on PineBridge Global Bond Fund transferred from Level 3 to Level 2. During the financial year ended 31 December 2023 British Airways Pass-Through Trust held on PineBridge USD Investment Grade Credit Fund and Land O'Lakes Capital Trust I held on PineBridge USD High Yield Bond Fund transferred from Level 3 to Level 2. No Level 3 reconciliation and no sensitivity analysis of assumptions used in determining the fair value have been included for these positions as they have been separately identified on the Schedule of Investments and are immaterial to the Fund at the financial year ended 31 December 2024 and the financial year ended 31 December 2023.

### 7. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish taxes on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payment to unitholder or any encashment, redemption, cancellation or transfer of units and any deemed disposal of units for Irish tax purposes arising as a result of the holding of units at the end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- (i) a unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with Schedule 2B of the Taxes Consolidation Act, 1997, are held by the Fund or the Fund has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) exempt Irish resident unitholders (as defined in Section 739D TCA) who have provided the Fund with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its unitholders, depending on the relevant Double Taxation Treaty.

Positive capital gains tax amounts reflected in the Statement of Comprehensive income are not amounts due to the Sub-Funds, these are amounts resulting from the difference in accruals between the financial year and the prior financial year.

### 8. SOFT COMMISSION ARRANGEMENTS

#### a) Direct brokerage

There was no direct brokerage services utilised for the financial year ended 31 December 2024 (31 December 2023: USD Nil).

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 8. SOFT COMMISSION ARRANGEMENTS (continued)

#### b) Soft Commission Arrangements

The Manager and the Investment Managers may utilise brokers with whom soft commission arrangements are in place. Any such arrangements will provide for best execution and any goods or services received will be of a type which assists in the provision of investment services to the Fund. Neither the Manager, the Investment Managers nor any of their connected persons retain cash rebates.

During the financial years ended 31 December 2024 and 31 December 2023, PineBridge Investments Asia Limited and PineBridge Investments LLC have entered into soft commission arrangements with brokers and details are given below. PineBridge Investments Japan Co., Limited and PineBridge Investments Europe Limited did not engage in soft commission arrangements during the respective financial years.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 8. SOFT COMMISSION ARRANGEMENTS (continued)

#### b) Soft Commission Arrangements (continued)

##### **PineBridge Investments Asia Limited (the “Investment Manager”)**

The Investment Manager has entered into soft commission arrangements with selected brokers where it obtains services from third parties. These services relate essentially to research and price information, performance measurement and portfolio valuation, and analysis all of which are believed to be helpful in the overall discharge of the Investment Manager’s duties to clients. As such services generally benefit all of the Investment Manager’s clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. Under such arrangements, no direct payment is made for these services or benefits. The trades were executed by the Investment Manager on the best available terms and there was no churning of trades. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

PineBridge Asia Dynamic Asset Allocation Fund  
PineBridge Asia ex Japan Equity Fund  
PineBridge Asia ex Japan Small Cap Equity Fund  
PineBridge Greater China Equity Fund  
PineBridge India Equity Fund

##### **PineBridge Investments LLC (the “Investment Manager”)**

The Investment Manager has entered into soft dollar commission arrangements with selected brokers where it obtains services from third parties. These services relate to research and are eligible under the safe harbor of Section 28(e) of the Securities and Exchange Act of 1934. These services generally benefit all of Investment Manager’s clients in terms of input into the investment decision making process. The soft dollar credits utilised are not allocated on a specific client basis. Under these arrangements direct payments can be made for these services and benefits. The Investment Manager seeks to obtain best execution on all transactions. During the financial year and prior financial year, the Investment Manager used soft commissions for the following Sub-Funds:

PineBridge US Research Enhanced Core Equity Fund  
PineBridge Europe Research Enhanced Equity Fund  
PineBridge Global Dynamic Asset Allocation Fund  
PineBridge Global Emerging Markets Focus Equity Fund  
PineBridge Global Focus Equity Fund  
PineBridge Latin America Equity Fund  
PineBridge US Large Cap Research Enhanced Fund

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 8. SOFT COMMISSION ARRANGEMENTS (continued)

#### c) Transaction Costs

For the financial years ended 31 December 2024 and 31 December 2023, the Sub-Funds incurred transaction costs, as defined in Note 1 (d)(viii) as follows:

	Financial year ended 31 December 2024 Total USD	Financial year ended 31 December 2023 Total USD
PineBridge Asia ex Japan Equity Fund	1,173,960	1,086,624
PineBridge Asia ex Japan Small Cap Equity Fund	5,050,610	2,841,190
PineBridge Asia Pacific Investment Grade Bond Fund	930	1,625
PineBridge Asian High Yield Total Return Bond Fund	1,440	4,110
PineBridge China A-Shares Quantitative Fund*	60,063	65,560

PineBridge Global Bond Fund	1,841	1,510
PineBridge Global Dynamic Asset Allocation Fund	646,885	533,940
PineBridge Global Multi Asset Alpha Fund	20,061	125,786
PineBridge Global Emerging Markets SDG Corporate Bond Fund**	385	805
PineBridge Global Emerging Markets Focus Equity Fund	401,006	493,265
PineBridge Global Focus Equity Fund	1,329,642	520,344
PineBridge Greater China Equity Fund	115,339	36,356
PineBridge India Equity Fund	3,535,413	1,654,016
PineBridge Japan Equity Fund	61,018	53,341
PineBridge Japan Small Cap Equity Fund	65,929	167,603
PineBridge Latin America Equity Fund	104,224	89,512
PineBridge US Large Cap Research Enhanced Fund	237,996	120,498
PineBridge US Research Enhanced Core Equity Fund	65,635	74,072
PineBridge USD High Yield Bond Fund	4,130	2,985
PineBridge USD Investment Grade Credit Fund	32,280	45,910
PineBridge Asia Dynamic Asset Allocation Fund	126,888	94,765

\*PineBridge China A-Shares Quantitative Fund terminated on 30 September 2024.

\*\*PineBridge Global Emerging Markets SDG Corporate Bond Fund terminated on 17 January 2024.

### 9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES

#### (a) Significant Agreements

The Manager is entitled to receive an annual management fee and unitholder servicing and maintenance fee (as appropriate) accrued at each dealing day and payable monthly in arrears based on the average daily NAV of the Sub-Funds, as detailed in tables in the next pages. Certain unit classes have fee caps in place whereby the total expenses charged to the unit class may not exceed certain annual thresholds. Where these thresholds are exceeded the management fee is reduced accordingly. The fee cap thresholds are noted in tables in the next pages where applicable.

## Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

### 9. SIGNIFICANT AGREEMENTS AND TRANSACTIONS WITH RELATED PARTIES (continued)

#### (a) Significant Agreements (continued)

	Management Fees	Unitholder Servicing & Maintenance Fees
Units for PineBridge Asia Dynamic Asset Allocation Fund Class L Units USD	1.25%	-

#### (b) Administration and Transfer Agent Fees

The Administrative Agent receives a fee from each Sub-Fund based on the relevant Sub-Fund's NAV subject to a maximum fee of 0.3% per annum and subject to an annual minimum fee to be agreed between the Manager and the Administrative Agent (plus value added tax, if any, in each case). The fee is accrued on each Dealing Day and is paid monthly in arrears.

All such fees, disbursements and out-of-pocket expenses will be paid by the Manager on behalf of the Fund or the relevant Sub-Fund. The Administrative Agent is also entitled to be reimbursed for all its disbursements and out-of-pocket expenses.

Transfer agent fees are disclosed within administration fees on the face of the Statement of Comprehensive Income for each Sub-Fund. Transfer agent fees amount to USD 10 per transaction.

#### (c) Trustee Fees

The annual remuneration of the Trustee, which is payable out of each Sub-Fund is based on the NAV of the relevant Sub-Fund and shall be subject to a maximum fee of 0.3% per annum, and an annual minimum fee to be agreed between the Manager and the Trustee (plus value added tax, if any), and will be retained by the Trustee out of the assets of the Sub-Fund. The fee is accrued on each Dealing Day and payable monthly in arrears.

In addition to such remuneration, the Trustee is entitled to be repaid all of its disbursements, including the fees and expenses of any sub-custodian (which shall be at normal commercial rates) and which will be retained by the Trustee out of the relevant Sub-Fund and transaction charges (which shall also be at normal commercial rates) levied by the Trustee. The amounts charged are shown in the Statement of Comprehensive Income.

#### (d) Related Party Transactions

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged.

##### *Transactions with parties who have significant influence*

The Manager is a related party under FRS 102 "Related Party Disclosures". Please refer to the Statement of Comprehensive Income for details of management fees (net of fee cap as applicable) and unitholder servicing fees earned by the Manager during the financial year under review and prior financial year and to the Statement of Financial Position for the amounts payable to the Manager as at the respective financial year end dates in respect of these fees.

The Directors of the Manager are not aware of any transactions with other connected persons during the year, other than those disclosed in these Financial Statements. All transactions were entered into in the normal course of business.

##### *Transactions with key management personnel*

PineBridge India Equity Fund holds 100% of the aggregated shares of PineBridge Investments GF Mauritius Limited. Michael Karpik and Michael Sweeney are also Directors of PineBridge Investments GF Mauritius Limited. They did not receive any director fees for the year.

Notes to the Financial Statements for the financial year ended 31 December 2024 (continued)

# PineBridge Global Funds (For Sub – Funds registered in Switzerland)

## Total Expense Ratios (Unaudited) (continued)

### Methodology advised in the Guidance Note

The TER (Total Expense Ratio) has been calculated on an ex-post basis (i.e. based on the actual costs charged), by reference to the preceding 12 month period ended 31 December 2023. Separate TER's have been produced for each Sub-Fund and for any unit class with different fee structures.

The TER is equal to the ratio of the Sub-Funds total operating costs to the average net asset value. Total operating costs are expenses deducted from the assets for the relevant fiscal period. The average net asset value is calculated using the net asset value as at each valuation point.

The TER for each share class of each Sub-Fund is calculated in accordance with the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association (AMAS), for the preceding period ended 31 December 2024.

# PineBridge Global Funds

## Schedule of Portfolio Changes for the financial year ended 31 December 2024 (Unaudited)

Listed below and overleaf are cumulative investment purchases and cumulative investment sales in excess of 1% of the total investment purchases or sales respectively during the financial year ended 31 December 2024. If there were fewer than 20 purchases that exceeded 1%, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there were fewer than 20 sales that exceeded 1%, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

## Remuneration Disclosure (Unaudited)

The Directors of PineBridge Investments Ireland Limited (the "Company") have put in place a remuneration policy and a remuneration committee. The Directors introduced and approved the remuneration policy on 28 December 2016 and the remuneration policy became effective as of 30 December 2016.

The remuneration policy is designed to be consistent with the requirements of regulation 5 of the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 and the ESMA Remuneration Guidelines ESMA/2016/411 (the "Remuneration Rules"). The remuneration policy is reviewed by the Directors at least once per year. In reviewing the remuneration policy, the Directors will consider whether the overall remuneration system:

- Operates as intended (in particular, that all agreed plans/programmes are being covered),
- That the remuneration pay-outs are appropriate relative to the complexities of the operation of the Company, and
- That the risk profile, long-term objectives and goals of the Company are adequately reflected.

Details of the up-to-date remuneration policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits, are available at [www.pinebridge.com](http://www.pinebridge.com).

The remuneration committee applies the remuneration policy with the aim of protecting the interests of Fund investors by ensuring that the remuneration of risk takers working for the Fund are subject to appropriate remuneration structures and the interests of these risk takers are aligned with those of the Company and the Fund.

### Identified Staff of Delegated Investment Managers

The Company has delegated certain investment management activities to group companies. These group companies are also subject to the requirements on remuneration under the Remuneration Rules. The aggregate fixed remuneration of identified staff of the delegates, this being the investment managers and risk takers during 2024 was USD \$2,286,776 and the variable component of their remuneration was USD \$4,252,738. This remuneration disclosure is provided on a prorated basis for the part of the Funds' assets which were managed by the identified staff within the delegates and covers 30 recipients of remuneration.

### Identified Staff of the Company

In accordance with the Company's Remuneration Policy, the following persons are considered to be the "Identified Staff" of the Company for remuneration committee review purposes: (a) any member of the Board and (b) the Designated Persons (PCF 39). The board of directors of the Company includes 2 Independent, Non-Executive Directors.

These 2 Non-Executive Directors, each of whom is independent, receive a fixed fee only and do not receive variable remuneration.

Where applicable, these fees are considered to be consistent with the powers, tasks, expertise and responsibility of each Director. The fixed remuneration for the 9 Designated Persons and 4 board members was USD \$1,168,978 and the variable remuneration component was USD \$682,376.

## Appendix III - Sustainable Finance Disclosure Regulation (Unaudited)

### SFDR Article 6 Disclosures for Annual Report

With respect to the below-listed Sub-Funds managed in line with Article 6 of SFDR (together the “Article 6 Sub-Funds”), each Sub-Fund does not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, each Sub-Fund managed in line with Article 6 of SFDR shall not be expected to pursue an investment approach that explicitly promotes environmental or social characteristics or to have sustainable investment as its objective. Notwithstanding this classification, the Investment Managers still consider that the Sub-Funds managed in line with Article 6 of SFDR are managed responsibly:

PineBridge Asia Dynamic Asset Allocation Fund  
PineBridge Europe Research Enhanced Equity Fund  
PineBridge Global Bond Fund  
PineBridge Global Multi Asset Alpha Fund  
PineBridge Greater China Equity Fund  
PineBridge US Large Cap Research Enhanced Fund  
PineBridge US Research Enhanced Core Equity Fund

SFDR does not require the Investment Managers to provide any ongoing disclosures in the annual report for the Sub-Funds managed in line with Article 6 of SFDR. For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying each Sub-Fund managed in line with Article 6 of SFDR did not take into account the EU criteria for environmentally sustainable economic activities.

### SFDR Article 8 Disclosures for Annual Report

The following Sub-Funds of the Unit Trust promoted environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) (“SFDR”) during the financial period by virtue of the incorporation of environmental, social or governance (“ESG”) and sustainability risk-related factors into their respective investment processes:

#### *Equity Funds*

PineBridge Asia ex Japan Equity Fund  
PineBridge Asia ex Japan Small Cap Equity Fund  
PineBridge Global Emerging Markets Focus Equity Fund  
PineBridge Global Focus Equity Fund  
PineBridge India Equity Fund  
PineBridge Japan Equity Fund  
PineBridge Japan Small Cap Equity Fund  
PineBridge Latin America Equity Fund

#### *Fixed Income Funds*

PineBridge Asia Pacific Investment Grade Bond Fund  
PineBridge Asian High Yield Total Return Bond Fund  
PineBridge USD High Yield Bond Fund  
PineBridge USD Investment Grade Credit Fund

#### *Multi-Asset*

PineBridge Global Dynamic Asset Allocation Fund

(together the “Article 8 Sub-Funds”)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions").

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

In seeking to attain characteristic “a”, the Sub-Fund monitored issuers’ carbon emission policies and engaged with them on the issue if needed. Characteristics “b” and “c” were met through maintaining the Sub-Fund’s portfolio without any exposure to the Exclusions.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2024 was **54.7**.

Weighted Average Carbon Intensity measures a portfolio’s exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

*Although PineBridge Investment’s information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the “ESG Parties”), obtain information (the “Information”) from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient’s internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

- b) The Sub-Fund’s Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2023 was **49.9**.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Not applicable

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions scope 1&2
- GHG Intensity
- Carbon Footprint
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact sector
- Exposure to controversial weapons
- UNGC violators.

For each issuer under coverage, analysts denote within our internal research platform the relevant PAIs that inform their ESG recommendations.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to PAIs that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party sources. An issuer’s performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months. The Sub-Fund incorporates these proprietary metrics (ESG Score and ESG Trend) along with other investment considerations to form a basis of issuer eligibility and position sizing.

In the course of our due diligence on sustainability risks, analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. Engagement is formally tracked, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

For the following two PAIs - exposure to controversial weapons and UNGC violators – the Sub-Fund excludes UNGC violators and issuers with an industry tie to controversial weapons.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2024

Largest Investments	Sector	% Assets	Issue Country

The table above details the largest Investments in the Sub-Fund as at 31 December 2024. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

### ● In which economic sectors were the investments made?

#### SECTOR BREAKDOWN (%)

	FUND
Financial	45.4
Quasi-Sov	12.5
Sovereign	8.2
TMT	6.9
Industrial	6.5
Real Estate	3.1
Diversified	2.2
Metals & Mining	1.3
Other	2.9
Cash	10.9

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes:  In fossil gas  in nuclear energy

No

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The investment manager took several actions which contributed to meeting the stated environmental and social characteristics during the period. The most substantial contribution came from security selections within the Utilities and other relevant sectors, where investments were made in issuers which maintain a significantly lower carbon footprint than the issuers within the benchmark, where there are a number of thermal power generators dependent on coal fired power. Elsewhere, selections within the Metals & Mining, Transport, Industrial and Energy sectors also contributed to the Sub-Fund’s focus on issuers’ impact on the environment. Additionally, the Sub-Fund’s underweight positions in those higher

emitting sectors – Utilities, Industrial, Energy and Transport – in favor of an overweight position in the Financial sector further contributed to the Sub-Fund’s focus on net zero alignment. Throughout the course of the year engagement with issuers was undertaken when deemed necessary regarding concern or uncertainty regarding the principal adverse impacts on sustainability factors.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

Not applicable

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Asia ex Japan Equity Fund

Legal entity identifier:  
549300SQHJZD245Y5351

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **144.7**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
  - Carbon footprint
  - GHG intensity
  - Exposure to companies active in the fossil fuel sector
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
  - Board gender diversity
  - Exposure to controversial weapons
- 
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
  - Carbon footprint
  - GHG intensity
  - Exposure to companies active in the fossil fuel sector
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
  - Board gender diversity
  - Exposure to controversial weapons
- 
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

Cash	0.4

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2024.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through our exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Asian High Yield Total Return Bond Fund

Legal entity identifier:  
549300IRFY1RU8V8NH89

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and social characteristics promoted by the Sub-Fund are:

a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and

b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and

c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons (“Exclusions”).

In seeking to attain characteristic “a”, the Sub-Fund monitored issuers’ carbon emission policies and engaged with them on the issue if needed. Characteristics “b” and “c” were met through maintaining the Sub-Fund’s portfolio without any exposure to the Exclusions.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2024 was **196.5**.

Weighted Average Carbon Intensity measures a portfolio’s exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

- b) The Sub-Fund’s Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund’s Weighted Average Carbon Intensity as at 31 December 2023 was **261.9**.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions scope 1&2
- GHG Intensity
- Carbon Footprint
- Exposure to companies active in the fossil fuel sector
- share of non-renewable energy consumption and production
- energy consumption intensity per high impact sector
- exposure to controversial weapons
- UNGC violators.

For each issuer under coverage, analysts denote within our internal research platform the relevant PAIs that inform their ESG recommendations.

In the course of their due diligence, analysts focus on key performance indicators (KPI) that align to principal adverse impacts that are of material risk to specific sectors and issuers. Those KPIs are sourced directly from the issuer – via sustainability or integrated annual reports or direct engagement with management – or from third party sources. An issuer’s performance in these KPIs relative to their industry peers forms the basis of our assignment of independent ESG Scores – which reflect the current state of sustainability risk – and ESG Trends – which are indicative of our outlook of sustainability risk over the next twelve months. The Sub-Fund incorporates these proprietary metrics (ESG Score and ESG Trend) along with other investment considerations to form a basis of issuer eligibility and position sizing.

In the course of our due diligence on sustainability risks, analysts may encounter areas of concern or uncertainty, which leads to issuer engagement. Engagement

is formally tracked, which includes the consistent flagging of the principal adverse impacts which are under scope for each engagement.

For the following two PAIs - exposure to controversial weapons and UNGC violators – the Sub-Fund Excludes UNGC violators and issuers with an industry tie to controversial weapons.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2024

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes:  In fossil gas  in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The research and monitoring described above formed the basis of inclusion and sizing of issuers in the Sub-Fund. The Investment Manager took several actions which contributed to meeting the stated environmental and social characteristics during the period. The most substantial contribution came from security selections within the Utilities and other relevant sectors, where investments were made in issuers which maintain lower carbon footprint. Contributions to the Sub-Fund's lower carbon footprint also came from underweight position in the high-emitting issuers. Throughout the course of the reference period engagement with issuers was undertaken when deemed necessary regarding concern or uncertainty regarding the principal adverse impacts on sustainability factors.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Global Dynamic Asset Allocation Fund

Legal entity identifier:  
549300XBQV2W41KZ1H26

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is the ‘Impact of the issuer on the Environment’; with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions.

The Sub-Fund endeavoured to meet this characteristic through the selection of active and passive strategies committed to emissions reduction and engagement with active managers and investee companies to drive improvement.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **How did the sustainability indicators perform?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **80.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

*Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient's internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

### ● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity at 31 December 2023 was **118.3**. During the one-year period ending 31 December 2024, the Weighted Average Carbon Intensity decreased from 118.3 to 80.9. This reduction was driven primarily by a shift in investment focus from emerging market regions, which generally have higher carbon intensity, to developed market regions.

In accordance with the Sub-Fund's forward view approach to asset allocation, the Investment Manager is focused on forward improvement with regard to ESG factors. The Investment Manager expects the Sub-Fund's Weighted Average Carbon Intensity to fluctuate around an overall declining trend. The Investment Manager measures both the point-in-time Weighted Average Carbon Intensity at the Sub-Fund level and also the forward improvement in Carbon Intensity at the security level.

Supplemental to measuring Weighted Average Carbon Intensity at the Sub-Fund level, the Investment Manager also measures year over year improvement in Carbon Intensity for the investee companies held in the Sub-Fund at 1 January 2024. The Carbon Intensity was measured for the investee companies held in the Sub-Fund at 1 January 2024 through the period ending 31 December 2024. The ratio of companies that improved their Carbon Intensity to those that did not exceeded 2.0, measured by both count and market value, meaning that two companies improved for every one company that did not.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG Emissions (Scope 1&2) – An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Emissions data also is used: (1) to identify companies with improving emissions characteristics in constructing and managing passive strategies, and (2) to identify investee companies to drive actionable change through engagement.
- Carbon Footprint - An external vendor provides company level GHG Emissions data, which is “rolled-up” to facilitate asset class level research and investment decisions. The impact on the product’s Carbon Footprint is considered when asset allocation decisions are made. The product’s Carbon Footprint is measured quarterly.
- GHG Intensity of investee companies - An external vendor provides company level GHG Intensity data, which is “rolled-up” to facilitate asset class level research and investment decisions. GHG Intensity data also are used: (1) to identify companies with improving emissions characteristics in constructing and managing passive strategies, and (2) to identify investee companies to drive actionable change through engagement.
- Violations of UN Global Compact principles and OECD Guidelines for Multi-National Enterprises - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Violations data also is used to identify investee companies to drive actionable change through engagement.
- Board Gender Diversity - An external vendor provides company level data, which is “rolled-up” to facilitate asset class level research and investment decisions. Board Gender Diversity data also is used to identify investee companies to drive actionable change through engagement.
- GHG Intensity of investee countries - An external vendor provides country level data, which is included in the product’s Carbon Footprint. GHG Intensity data sourced from public data is in our proprietary Sovereign Scorecard, which informs country level research and investment decisions.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes:  In fossil gas  in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

## What was the share of socially sustainable investments?

Not applicable

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

To comply with the EU

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Team engaged directly with the top investee companies contributing to the Sub-Fund's GHG Intensity to assess Management's commitment to environmental improvement, drive improved GHG disclosures consistent with global best practice, review Net Zero alignment and drive continued progress towards GHG Emissions and GHG Intensity reduction. Several engagements were follow-ons from prior years, and escalated so that proxy votes reflected the engagement assessment. The Investment Manager also engaged with active managers regarding their underlying top holdings identified for GHG Emissions reduction and GHG Intensity improvement, to confirm the active manager is following their stated engagement process.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Global Emerging Markets Focus Equity Fund

Legal entity identifier:  
5493009KAIGD212JO634

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **71.7**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

*Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for recipient's internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **59.4**.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
  - Carbon footprint
  - GHG intensity
  - Exposure to companies active in the fossil fuel sector
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
  - Board gender diversity
  - Exposure to controversial weapons
- 
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2024

The table above details the largest Investments in the Sub-Fund as at 31 December 2024. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● In which economic sectors were the investments made?

#### SECTOR BREAKDOWN (%)

	FUND
Financials	27.9
Information Technology	27.6
Consumer Discretionary	15.9
Communication Services	8.9
Industrials	7.2
Health Care	5.3
Energy	3.0
Materials	1.8
Other	1.1
Cash	1.3

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

Yes:  In fossil gas  in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- c) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund sought to engage with companies where it saw potential to improve a company's environmental impact if it is deemed material. The Sub-Fund computes portfolio company emissions on a quarterly basis and has seen emissions per unit revenue and per unit AUM declining in the past year. The Investment Manager will continue to seek to engage with investee companies to maintain the momentum of reducing carbon emissions in line with reaching net zero.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund's portfolio with no holdings in UNGC violators throughout the period to 31 December 2024. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **922.6**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **1,100.4**.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Sub-Fund considered the following principal adverse impacts ("PAIs") on sustainability factors:

- GHG emissions (Scope 1 & 2)
- Carbon footprint
- GHG intensity
- Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
- Board gender diversity

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Exposure to controversial weapons
  - GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity. The Sub-Fund assesses a company's GHG emissions, intensity, and carbon footprint, by reviewing recent trends, prospective plans, and performance versus peers. The Sub-Fund seeks to engage with companies to communicate the importance of reducing emissions.
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund maintained a portfolio throughout the period to 31 December 2024 with no holdings in UNGC violators.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

In addition to taking into consideration the PAIs detailed above, the Investment Manager has been engaging with investee companies to encourage them to publish data on all PAIs. The Sub-Fund takes into consideration the disclosed PAI data and engages with companies to ensure that their score on each parameter improves over time. The Sub-Fund encourages companies to disclose more PAI data so that they can be monitored. The Sub-Fund monitors PAI data on a regular, at least every quarter end, basis.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2024

Largest Investments	Sector	% Assets	Issue Country
INDIAN BANK COMMON STOCK INR10.0	Financial	7.02%	INDIA

The table above details the largest Investments in the Sub-Fund as at 31 December 2024. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

SECTOR BREAKDOWN (%)	
	FUND
Financials	39.8
Industrials	13.9
Materials	9.7
Consumer Discretionary	8.4
Consumer Staples	7.7
Information Technology	7.5
Health Care	6.4
Energy	4.0
Other	2.0
Cash	0.6

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund’s Net Asset Value.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:  In fossil gas  in nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2024, including giving detailed presentations to high GHG emitting companies on the impact they are having on total emissions and the steps they need to take to get the emissions down. These would include switching to renewable sources of energy, use of electrified transport, invest in carbon capture and storage, etc. The Sub-Fund encourages companies to keep reducing pollutant discharge below the limits set by the local environmental laws.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through maintaining the Sub-Fund’s portfolio with no holdings in UNGC violators throughout the period to 31 December 2024. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through our exclusions which were maintained throughout the period.

The Sub-Fund uses shareholder meetings to sensitise the boards of the companies on SFDR requirements and conducting business sustainably.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Japan Equity Fund

Legal entity identifier:  
549300OBI10Y31R7Q498

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- exclusion of any issuer that is not in compliance with the United Nations Global Compact (UNGC) principles, and
- exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions, which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **56.4**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **49.5**.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
  - Carbon footprint
  - GHG intensity
  - Exposure to companies active in the fossil fuel sector
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises
  - Board gender diversity
  - Exposure to controversial weapons
- 
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
  - Violations of UNGC principles and OECD Guidelines for Multinational Enterprises. The Sub-Fund excludes UNGC violators in its investment process.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Sub-Fund engaged with several of its portfolio companies on the subject of environmental impact during 2024.

The environmental and social characteristic of avoiding issuers that were not compliant with UNGC principles was met through the Exclusions which were maintained throughout the period. Similarly, the social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:  
PineBridge Latin America Equity Fund

Legal entity identifier:  
549300OR17AR5ZP3IH60

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Sub-Fund are:

- a) 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions, and
- b) exclusion of any issuer that has an industry tie to landmines, cluster munitions, chemical weapons or biological weapons ("Exclusions")

During the period covered by the report, the Sub-Fund assessed the impact of the issuer on the environment when performing due diligence on stocks, and only invested in stocks that met a minimum threshold for environmental impact. The Sub-Fund also only invested in stocks that met a minimum threshold for social factors including diversity considerations and corporate behaviors. In addition, the Sub-Fund has sought to engage with companies where it saw potential to improve a company's environmental or social impact if it was deemed material.

The social characteristic of avoiding issuers that have an industry tie to landmines, cluster munitions, chemical weapons or biological weapons was met through the Exclusions which were maintained throughout the period.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

- a) The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **185.5**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

*Source: MSCI ESG Research LLC, as at 31 December 2024*

*Although PineBridge Investment's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. Furthermore, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.*

- b) The Sub-Fund's Exclusions were maintained during the period covered by the report.

● **...and compared to previous periods?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **228.7**.

Rather than focus solely on historical/current emissions intensity, the Investment Manager's investment process is forward-looking and consequently

the Investment Manager is willing to own high emitting companies that have a clear plan for improvement in the future.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

- GHG emissions (Scope 1 & 2)
  - Carbon footprint
  - GHG intensity
  - Exposure to companies active in the fossil fuel sector
  - Board gender diversity
  - Exposure to controversial weapons
- 
- GHG emissions (Scope 1 & 2), Carbon footprint, GHG intensity, Exposure to companies active in the fossil fuel sector. The Sub-Fund assesses a company’s GHG emissions, intensity, and carbon footprint, looking at recent trends, prospective plans, and performance versus peers. This analysis is of particular importance when assessing companies that are active in the fossil fuel sector.
  - Board gender diversity. The Sub-Fund assesses board gender diversity when performing due diligence on issuers.
  - Exposure to controversial weapons. The Sub-Fund excludes companies with an industry tie to controversial weapons in its investment process.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The table above details the largest Investments in the Sub-Fund as at 31 December 2024. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is 'Impact of the issuer on the Environment' with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

The promotion of this environmental characteristic is active and in progress. The Investment Manager utilized its own internal research as well as data from third party vendors to gain insight into portfolio companies ESG characteristics; this includes carbon intensity via scope 1 & 2 emissions. While this data set remains incomplete, most issuers in the investment universe have some level of coverage allowing significant visibility into ESG themes of the portfolio relative to the

investment universe. During 2024 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes including carbon intensity & issuers plans to reduce emissions in the future. Continuation of the engagement process will shape the progress of the portfolio in meeting the promoted environmental characteristic.

● ***How did the sustainability indicators perform?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **314.5**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity Is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

● ***...and compared to previous periods?***

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2023 was **416.3**.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

1. GHG Emissions (scope 1&2)
2. Carbon Footprint
3. GHG Intensity
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Exposure to controversial weapons
7. UNGC Violators

In consideration of points 1 to 5 above, the Sub-Fund conducted issuer specific due diligence and compared issuers relative to their industry peers. This environmental risk analysis is an important part of evaluating an issuer’s potential credit risks and highlighting opportunities to engage with management teams.

In consideration of points 6 and 7 above, the Sub-Fund utilized third party data to highlight exposure to controversial weapons & UNGC Violators. During the period covered by the report there has been no exposure in the Sub-Fund to issuers with exposure to controversial weapons and no exposure to UNGC violators.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

All issuers purchased in the Sub-Fund must be approved by the Investment Manager’s Investment Committee, and because ESG factors are a key part of the assessment of issuer credit risk, the Investment Manager believes that its investment process aligns with the environmental characteristic promoted by the Sub-Fund, with issuers not selected for the Sub-Fund’s portfolio for ESG reasons. During 2024 the Investment Manager concluded its first round of engagement with issuers around a variety of ESG themes. Continuation of this process will help shape the progress of the portfolio in meeting the promoted environmental characteristic. Issuers that do not make progress on specific engagement issues over time may be removed from the issuer approved list which would require them to be divested from the Sub-Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristic promoted by the Sub-Fund is 'Impact of the issuer on the Environment'; with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

During the period covered by the report, the Sub-Fund looked to promote the environmental characteristic through detailed analysis and active engagement with the management of underlying issuers. The Investment Manager continued to engage with the issuers with a focus on Net Zero alignment and actionable change on greenhouse gas ("GHG") emissions.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Fund's Weighted Average Carbon Intensity as at 31 December 2024 was **213.9**.

Weighted Average Carbon Intensity measures a portfolio's exposure to carbon intensive companies. The Weighted Average Carbon Intensity is determined by calculating the carbon intensity (Scope 1 + 2 Emissions / \$M Sales) for each portfolio constituent and calculating the weighted average by portfolio weight.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts (“PAIs”) on sustainability factors:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI	Consideration
GHG Emissions	Analysts monitored Scope 1 & Scope 2 GHG issuer emissions
Carbon Footprint	Analysts monitored Carbon Footprint reduction commitments as well as an issuer’s strategy and progress toward achieving those commitments
GHG Intensity	GHG Intensity is a factor in consideration when assessing credit risks and data is deemed comparable. In many cases companies’ state of disclosure and reporting methodologies continue to vary considerably.
Energy Consumption Intensity	This metric is monitored. However, it is acknowledged that continued disclosure inconsistencies make intra-sector comparisons difficult.
Board Gender Diversity	Board, management, and employee diversity are considered as part of our analysis of governance. Our evaluation of diversity is not limited to gender, but includes ethnicity, age and experience as well.
Exposure to controversial weapons	It is addressed through review of relevant controversies at the sector and issuer level, not necessarily through a % revenue indicator of exposure.
Energy Performance (Share of non-renewable energy sources)	Issuer's plans to transition energy supply toward renewable sources over time are evaluated.
Lack of Human Rights Policy	The public disclosure of human rights policies, including criteria for remediation, are monitored.

The Investment Manager monitored the output of these PAIs in comparison with the peers/industry and engaged with the issuer, where deemed appropriate. The Investment Manager may choose to encourage improved disclosure, strategy or targets where appropriate. The Investment Manager also chose to monitor other PAIs based on the data availability of the PAI and its coverage of the investment universe in 2024.

The table above details the largest Investments in the Sub-Fund as at 31 December 2024. The percentage of assets stated is relative to the Sub-Fund's Net Asset Value.

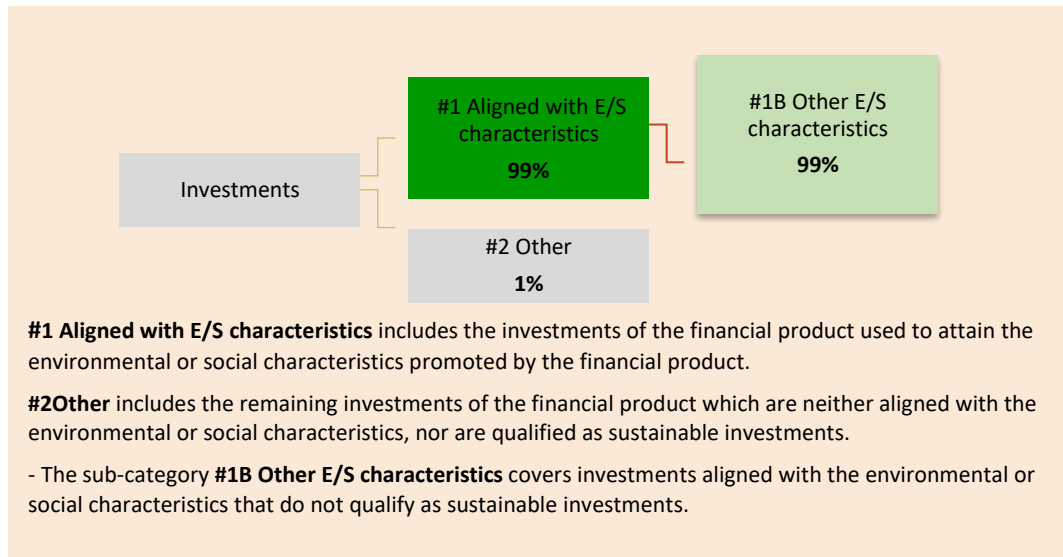

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2024

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### ● In which economic sectors were the investments made?

#### SECTOR BREAKDOWN (%)

	FUND
Financial Institutions	32.5
Consumer Non-Cyclical	14.1
Utility	7.4
Capital Goods	7.4
Government	7.0
Communications	6.7
Energy	6.6
Technology	5.6
Other	11.4
Cash	1.4

The table above details the sector breakdown of the Sub-Fund as at 31 December 2024. The percentages stated are relative to the Sub-Fund's Net Asset Value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste arrangement rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?*

Yes:  In fossil gas  in nuclear energy

No

- *What was the share of investments made in transitional and enabling activities?*

Not applicable

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Investments under “other” above included cash & cash equivalent holdings and FDIs used for efficient portfolio management purposes. They were not subject to environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Manager continued to perform detailed analysis and actively engaged with issuers with a focus on Net Zero alignment and actionable change on greenhouse gas (“GHG”) emissions. The Investment Manager has engaged with a number of issuers during 2024, focusing on existing disclosure, policy and strategy around emissions reduction efforts and targets. In some cases, engagement efforts include encouraging additional disclosure or more robust targets where appropriate.

**How did this financial product perform compared to the reference benchmark?**

Not Applicable

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable

- ***How did this financial product perform compared with the broad market index?***

Not Applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
