What is this product?

Type

UCITS investment fund in the form of an authorised unit trust.

Term

The Sub-Fund has no maturity date, however the Manager is entitled to terminate the Sub-Fund at any time.

Objectives

Investment objective The Sub-Fund seeks to achieve a high rate of return by making equity (i.e. shares) and equity-related investments in small companies, whose assets, products or operations are in Europe.

The Sub-Fund will invest not less than two-thirds of the Sub-Fund's total assets in small companies whose assets, products or operations are in Europe. The Investment Manager considers "small" companies to be companies which have a market capitalisation in the range of the companies included in the Index.

The Sub-Fund's investment policy will require some flexibility as, for example, companies which may be regarded as small, as determined by market capitalisation in one country, may be considered as much more significant in other countries. Market appreciation and change in the level of valuation would also alter any absolute definition of a smaller company but would not change any relative definition. The Investment Manager constructs the portfolio based on a combination of bottom-up high conviction lists, a top-down country allocation framework, and a top-down industry allocation framework.

The Sub-Fund may invest no more than 20% of its Net Asset Value in locally listed Russian shares at any one time and investment will only be made in equity securities that are listed / traded on the Moscow Stock Exchange. Such an investment will not form the principal focus of the Sub-Fund.

The Sub-Fund will not invest more than 25% at the time of purchase in aggregate of the Sub-Fund's Net Asset Value in securities listed on Recognised Exchanges in Emerging Markets, as listed in the prospectus.

The Sub-Fund may use financial derivative instruments ("FDI") for efficient portfolio management (including hedging) purposes only. The Sub-Fund will not use FDI extensively for any purpose.

Share Class Benchmark The benchmark is MSCI Europe Small Cap Index.

Benchmark The Sub-Fund is actively managed, in reference to a benchmark. The Sub-Fund is seeking to deliver excess returns over the Sub-Fund's benchmark. The holdings may or may not be components of the benchmark and the Investment Manager has discretion to deviate entirely from the benchmark securities, weightings and risk characteristics. The degree to which the Sub-Fund resembles the composition and risk characteristics of the benchmark is not a specifically targeted outcome and could vary over time, and the Sub-Fund's performance may be meaningfully different from that of the Sub-Fund's benchmark.

Redemption and Dealing This Unit Class of the Sub-Fund may be redeemed on demand on any dealing day as detailed in the supplement. The price you pay or receive depends on the net asset value per unit on the dealing day when the unit is bought or sold.

Distribution Policy This Unit Class does not distribute dividends and any income and gains will be reinvested in the Unit's net asset value.

Intended retail investor

The Sub-Fund is intended for investors who wish to invest in shares and equity-related securities of small European companies, who can bear loss in the short to medium term and have a medium to long term investment horizon, who plan to remain invested for at least 5 years. Investors should be prepared to take on the level of risk identified in the section, 'What are the risks and what could I get in return?' The Sub-Fund is designed to form part of a broadly diversified portfolio of investments, particularly for investors with little past experience of this type of investment.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies, and whether the share class is hedged or unhedged.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between December 2021 and April 2024.

Moderate: this type of scenario occurred for an investment between November 2015 and November 2020.

Favourable: this type of scenario occurred for an investment between October 2016 and October 2021.

What happens if PineBridge Investments Ireland Limited is unable to pay out?

Investors are unlikely to face a financial loss due to a default of the Manager as the assets of the Sub-Fund are segregated from those of the Manager.

There is no compensation or guarantee scheme in place which may offset any potential loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	1,068 EUR	2,138 EUR
Annual cost impact*	10.6%	4.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.8% before costs and 0.3% after costs.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Sub-Fund is designed for investors with a with a medium to long-term investment horizon; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period at the prevailing net asset value, or hold the investment longer. If you redeem at an early stage this will increase the risk of lower investment returns or a loss. Please refer to the PineBridge Global Funds Prospectus and the Sub-Fund's Supplement for further details.

How can I complain?
